ABSTRACT

In 1994, the National Science Foundation (NSF) launched the Urban Systemic Initiative (USI) program, applying lessons learned from the Initial State Systemic Initiative (SSI) program to the problems of inner city school systems. The USI program was offered to cities with the largest number of K-12 students living in poverty. Five cohorts of cities signed cooperative agreements with NSF for a five-year concerted system-wide effort to promote standards-based reform in mathematics, science, and technology (MST). The NSF investment was meant to be a catalyst for large-scale educational change affecting standards, curriculum, assessment, professional development, partnerships, and convergence of intellectual and fiscal resources with constant attention to improving student achievement. Over the course of the systemic initiative programs, NSF developed a theoretical structure for systemic reform that is based on six "drivers", including four process drivers and two student outcome drivers as well as a number of cross-cutting issues such as equity, quality, scaling up, coordination, and organization. Systemic Research, Inc. received a three-year grant to explore the impact of the NSF's USI program on student achievement and the learning infrastructure in urban school districts by examining relationships among the process drivers (factor or independent variables), and outcome drivers (system output or dependent variables). The intent was to establish an inferential causal structure that allows reasonable attribution of impacts to program elements. As an instrument for systemic analysis, Key Indicator Data System (KIDS) was used. Results of the study allow broader dissemination of successful systemic initiative models based on a reverse engineering approach. Results of the analysis are organized into three volumes: (1) Volume I: Cohort 93; (2) Volume II: Cohort 94; and (3) Volume III: Cohort 95, 97, and 99 School Districts. (Author/SOE)

About USI and KIDS

In 1994, NSF launched the Urban Systemic Initiative (USI) program, applying lessons learned from its Initial State Systemic Initiative (SSI) program to the problems of inner-city schoolsystems. The USI program was offered to major cities with the largest number of K-12 students living in poverty. Five cohorts of cities signed cooperative agreements with NSF for a five-year concerted system-wide effort to promote standards-based reform in mathematics, science, and technology (NST). The NSF investment was meant to be a catalyst for large-scale educational change affecting standards, curriculum, assessment, professional development, partnerships, and convergence of intellectual and fiscal resources, with constant attention to improving student achievement. NSF's focus on results has become even stronger following passage of the Government Performance and Results Act (GPRA). Over the course of its systemic initiative programs, NSF has developed a theoretical structure for systemic reform that is based on six "drivers" including four process drivers and two student outcome drivers, as well as a number of cross-cutting issues such as equity, quality, scaling up, coordination and organization.

Systemic Research, Inc. received a three-year grant to explore the impact of the NSF's USI program on student achievement and the learning infrastructure in urban school districts by examining relationships among the process drivers (factor or independent variables) and outcome drivers (system output, or dependent variables). The intent was to establish an inferential causal structure that allows reasonable attribution of impacts to program elements. Results of the study allow broader dissemination of successful systemic initiative models based on a "reverse engineering" approach.

As a vital instrument for systemic analysis, our evaluative study team developed a Key Indicator Data System (KIDS) to collect comprehensive annual core data using both quantitative (K-1: focused on demographics, student outcomes, and teacher preparations) and qualitative (K-2: focused on policies relevant to six drivers) templates. KIDS was tailored to each cohort/site due to the differences in USI initiatives, curriculum structure, and student assessment systems.

With the cooperation from 22 USI sites (PE/PDs, data managers, and local evaluators), as well as collaboration from the Educational Testing Service, The College Board, and ACT, Inc., our study team completed KIDS data collection. The qualitative data was also compiled/extracted from the individual Annual Reports and PER documents collected from all 22 sites during the project period.

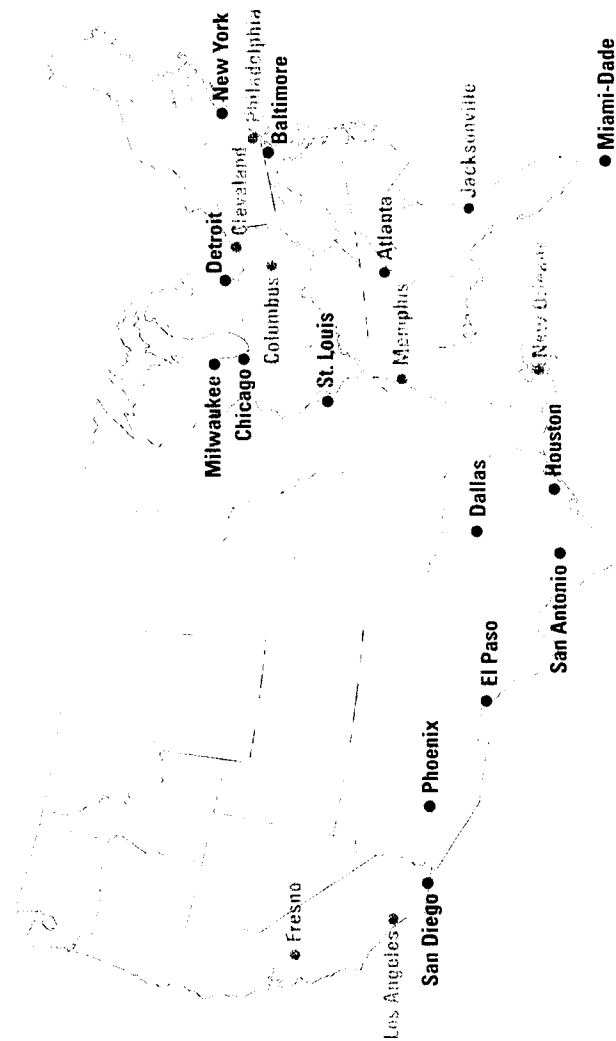

The three-volume Urban School Key Indicators of Science and Mathematics Education: 2001 presents the essence of each USI's progress based on KIDS-1999, 2000, and 2001 from each site's baseline year to SY 1999-00. This report replaces Urban School Key Indicators of Science and Mathematics Education: Based on Key Indicator Data System (KIDS-1999), Volumes I-IV.

Please refer to our evaluative study web site <http://www.systemic.com/usior> the Systemic Initiative (SI) study group web site <http://www.sistudyform.org> for details of study progress and available electronic version of various study reports.

Project Information

USI Project Title : Baltimore USI
 Cohort: 93 (Sept. 94 - Aug. 00)
 USI Web Site: <http://www.morgan.edu/academic/special/busi/busi.htm>

Project Summary

The Baltimore Urban Systemic Initiative placed mathematics and science Instructional Support Teachers (ISTs) in low-performing middle and high schools and partially funded ISTs in elementary schools as part of an NSF-funded K-5 mathematics project. Professional development has been a key element of the BUSI project and continues to be supported by BCPSS.

Project Goals

- ◆ To improve the scientific and mathematical literacy of all students in the Baltimore City public schools.
- ◆ To provide all students with the mathematics and science fundamentals to participate fully in a technological society.
- ◆ To enable a significantly greater number of students to pursue careers in mathematics, science, engineering, and technology.

BUSI also ran student tutoring programs in middle schools and in public housing community centers, with college students as tutors. BUSI initiated regular meetings with the informal science education institutions in Baltimore City.

BUSI has affected the culture of the Baltimore City Public School System (BCPSS) during its period of system reform, which has included purchase of mathematics and science textbooks and materials for every student, curriculum revisions, extensive professional developing supporting the new materials and curriculum, and unit and end-of-course assessments based directly on the curriculum.

Primary Decision Making Body

Standards Curriculum	District
Curriculum/Text/Book Adoption	District
Student Assessment	State/District
Professional Development	District
Resources	State/District
Teacher Hiring	District
Teacher Contracts	District
Certification & Re-certification	State
Graduation Requirements	State/District
School-Based Management?	No

Policies Promoting Equal Access by All Students in High Quality Education

Student Tracking:	<ul style="list-style-type: none"> 3 Mathematics and 3 Science courses required for high school graduation Required math and science courses are pre-college courses All math & science courses are standards-based
Criteria for Entry into High Level Mathematics and Science Courses:	<ul style="list-style-type: none"> For Algebra I in 8th grade, passing functional math test & good grades. For high school math and science honors courses, good grades & passing the functional math test are required. Satisfactory completion of prerequisite courses required for entrance to upper-level math and science courses.

Urban Systemic Initiatives (USI)

Availability of High Level Courses:
 Expanding availability of honors and upper level courses

Special Education and Bilingual Students:
 To an increasing extent, special education students are enrolled as inclusion students in regular classes and provided with additional support

Policies Impacting the Enrollment of Students in Challenging Math and Science Courses

Student Support Systems:

- For promotion, summer school remediation required for elementary students who fail math or score in the lower quartile on CTBS.
- For promotion, summer school remediation required for middle school students who fail math, score in the lower quartile on CTBS or fail the functional math test.
- High school students may retake failed math or science courses in summer school.
- Tutoring and afterschool programs as needed

Policies Relevant to Curriculum Framework:

Maryland Learning Outcomes and Content Standards (elementary and middle)
 Maryland Core Learning Goals (high school)
 District developed curricula based on Maryland frameworks
 E. Math in My World, Discovery Works, FOSS
 M. Middle School Math, Connected Math, Science Explorer Series, Event Based Science
 H. Math and Science Texts specific to courses

New Courses Added -Result of USI?
 Instructional Time:
 Elementary Math: 180 hours annually
 M.S. math and science: 135 hours annually
 H.S.: 135 hours per course.

Standards-based Curriculum and Instruction

Standards Adopted:

- K-8: Maryland Learning Outcomes and Content Standards (Mathematics) based on National Council of Teachers of Mathematics (NCTM) documents
- K-8: Maryland Learning Outcomes and Content Standards (Science) based on American Association for the Advancement of Science (AAAS) and National Research Council (NRC) standards

G9-12: Maryland Core Learning Goals based on national documents.

Primary Instructional Strategies:
 Elem/Middle Math: Emphasis is on students explaining and defining ideas, approaches, and solutions orally and in writing using symbols, words and tables.

Elem/Middle Science: Topics are structured as engagement, exploration, explanation, extension and evaluation.

High School math and science: In most schools, courses are semester-long, with 90 minute periods. Emphasis is on calculator use in math and laboratory activities in science.

% of Students Experiencing Standards-based Mathematics Curriculums:

E: 90%
 M: 100%
 H: 100%
 E: 100%
 M: 100%
 H: 100%

% of Students Experiencing Standards-based Science Curriculums:

E: Elementary School M: Middle School H: High School

Program Data

USI Project Title : Chicago USI
Cohort: 93 (Sept. 94 - Aug. 00)
USI Web Site: <http://www.usi.luc.edu/csi/home.html>

Project Summary

The Chicago Systemic Initiative (CSI) is a comprehensive mathematics, science, and technology reform initiative that, during its 5-year funding period, will fundamentally change the way mathematics, science, and technology are presented in grades K-12 in all 553 Chicago public schools. CSI works within the spirit and the letter of the reform law of 1988 that decentralized Chicago public schools and the 1995 Amendatory Act to the Illinois School Code that empowers the Trustees to ensure ongoing academic improvement. The underlying conviction of CSI and its participants is that all children can learn science and mathematics. All providers of mathematics, science, and technology instruction in the metropolitan area will be affected by these changes.

CSI, aligned with the Chicago Public Schools' Children First Education Plan, promotes standards-based instruction as an organizing principle for the various national, state, and local efforts to reform mathematics and science instruction. CSI has identified five significant features to impact systemic change: the formation of design teams, parent/community partnerships, network with internal and external partners, Internet Access and Training, and a Third Annual Resource Menu.

Project Goals

- ♦ To improve the scientific and mathematical literacy of all students in the Chicago Public Schools.
- ♦ To provide the mathematics and science fundamentals that will permit all students to participate in a technological society.
- ♦ To enable a significantly greater number of Chicago students to pursue careers in mathematics, science, engineering, and technology.

Dallas USI

Program Data

USI Project Title : Dallas USI
Cohort: 93 (Sept. 94 - Aug. 00)
USI Web Site: <http://www.dallas.isd.tenet.edu>

Project Summary

The Dallas Urban Systemic Initiative (DUSI) seeks to: (1) improve the scientific and mathematical literacy of all district students; (2) provide the science and mathematics fundamentals that will permit all students to participate fully in a technological society; and (3) enable a significantly greater number of these students to pursue careers in science, mathematics, engineering, and technology. The proposal has six components: (1) program leadership; (2) total quality management; (3) integrated curriculum; (4) interactive learning; (5) teacher enhancement; and (6) aligned assessment and accountability.

This Initiative has implemented a management structure for the Dallas Independent School District (DISD) based on the principles of total quality management (TQM) and a K-12 science, mathematics, and technology curriculum. The implementation and delivery of the Initiative is supported by ongoing professional development activity for all teachers and by the use of educational technology in all classrooms. The Initiative is further supported by new District policies, by the redirection of resources within the District, and by the integration of a variety of resources from the science-rich and other community partners.

The USI initiative has allowed the District to implement standards-based, nationally recognized programs such as the National Urban Coalition's Family Math and Science, Project SEED, FOSS, GEMS, AIMS, Science 2000, CEPUP and SEPUP. In addition, a \$2 million IBM Reinventing Education Grant has been acquired to integrate math, science, and technology.

Point of Contact teachers for each school were selected through the Initiative to share information on the latest curricula materials and on events that impact science instruction as a part of the National Science Teachers Association (NSTA) Texas model for Building a Presence for Science.

Project Goals

All DISD students, upon graduation, will be prepared to succeed in the scientific and technological workplace of the 21st century. Students in all racial, ethnic, and gender groups will be qualified for higher education and able to compete for careers in science, mathematics, and engineering.

*Core Data Elements 2000-2001; **K-1 2001

Italics: Data Imputed

Primary Decision Making Body

Standards Curriculum	State
Curriculum/Text/Book Adoption	State
Student Assessment	School
Professional Development	School
Resources	State
Teacher Hiring	District
Teacher Contracts	District
Certification & Re-certification	State
Graduation Requirements	State
School-Based Management?	Yes

Policies Promoting Equal Access by All Students in High Quality Education

Student Tracking:	Most low level courses were eliminated
Criteria for Entry into High Level Mathematics and Science Courses:	Teacher recommendations, test scores on multiple measures, parental request and student interest
Availability of High Level Courses:	No remedial courses available No low level courses available Advanced Placement (AP) Statistics offered Advanced Placement (AP) Calculus offered

Urban Systemic Initiatives (USI)

Special Education and Bilingual Students:

• Limited Proficiency English (LEP) students all take math computation part of Iowa Test of Basic Skills (ITBS)

• Separate math & science for LEP & Special Ed students

• All students tested with Texas Assessment of Academic Skills (TAAS)

• AP Incentives- \$300 equipment grant to schools that provide college AP courses, and \$100 per student scoring 3 or better

Policies Impacting the Enrollment of Students in Challenging Math and Science Courses

Attendance : District/ State accountability systems provide incentives to schools

Guidance: Counselors available to all students

Student Support Systems: Student Support Team to assist at risk students

• Saturday mathematics tutoring

• Algebra enrichment/summer camp

• A grade of 70 or above needed on TAAS in grade 6 & 8 for promotion.

Others: \$150 stipend to teachers for teaching AP course

Policies Relevant to Curricula

Framework: Texas Essential Knowledge and Skills (TEKS)

Curricula:

Curricula Materials: DPS Core Curriculum

• Full Option Science System (FOSS)

• Everyday Mathematics

• Great Explorations in Math and Science (GEMS)

• Science Education for Public Understanding (SEPUP) (for middle and high school)

New Courses Added as a Result of USI:

Instructional Time:

Standards-based Curriculum and Instruction

Standards Adopted: National Council of Teachers of Mathematics (NCTM) Standards

• Texas State Standards (TEKS)

• National Research Council (NRC) Standards

• Hands-on learning

Primary Instructional Strategies: Inquiry based classroom activities

% of Students Experiencing Standards-based Mathematics Curricula: E: 33% M: 80% HS: 0%

% of Students Experiencing Standards-based Science Curricula: E: 33% M: 80% HS: 40%

E: Elementary School M: Middle School H: High School

Policies Relevant to Teacher Qualifications

Certification: State exams must be passed

• Alternative Certification program to attract non-traditional teachers

• District hires some uncertified teachers. Must be certified in 2 yrs. In reality, teachers remain uncertified and employed.

• \$1,000 stipend each year for teachers teaching in their certification subject

Requirement & Hiring Practices: Hiring incentives: stipend, advanced study Recruitment and Retention Plan

Professional Advancement & Leadership Training: Campus instructional leaders and math & science content cadres are trained

Contract Requirements: Teacher evaluation system addresses student outcomes

Others: Policies designed to recognize and reward excellence in mathematics and science teaching

Urban School Key Indicators of Science and Mathematics Education

I-56

Dallas USI

Professional Development Policies and Practices

Time Required or Supported:

- 35 hours required for experienced teachers; 70 hrs for new teachers
- Teachers may take professional leave to attend training, conferences, etc. without loss of pay
- Total quality management training required of all administrators/ principals institute established to promote SB instruction.
- Campus Instructional teams trained to use data to guide instruction.

Financial Resources Provided:

- Teachers subsidized \$450 for summer training
- Funds distributed to local superintendents, not Training and Staff Development Department

Alignment to Student Standards:

- Only sessions on SB programs are allowed

Measurement of Impact:

- Performance based assessment
- Classroom observation by Research and Evaluation staff, USI Service Team members and USI staff

Other:

- Campus instructional leadership conducts staff development.
- Standards-based content training

Type and Amount Received by Average Math/Science Teacher:

Evaluation Instruments:

Professional Development Alignment to Content Standards Measures:

Teacher's Instructional Practices Evaluation:

Classroom observation

Impact on Student Achievement:

Local, state and national assessments

Classroom observation by Math/Science/Technology Specialists

YES

USI Leadership, Governance, and Management

Superintendent:

- Dr. James Hughey Superintendent as of 1997-98

- In search for a new general superintendent

- Six superintendents since 1996

USI Office:

- USI project director is an Assistant Superintendent, Sally Dudley, Executive Director since 6/99

- USI specialists have specifically defined roles

Policies Relevant to Standards-based Assessments

Extent to Which Assessments are Aligned to District Standards and Curriculums:

- 100%

Methods stakeholders are informed of goals, objectives and accomplishments of assessment program:

- Newsletters
- Fliers
- Family Math/Science Night at individual schools

- Dallas Morning News
- KERA- public TV station

- Professional development offered to parents

- Report Cards (AEIS) published on web

Community Key Personnel:

- Mr. Hollis Brashear, President of Board of Education as of 12/97

Teacher Leaders:

- Math and Science Lead Teachers at every school serve as team leaders, network with USI specialists and teachers, model lessons, and share strategies

Partnerships

Other Key Initiatives:

- Eisenhower Funds
- Title I
- Reading Initiative
- Eisenhower Funds
- Title I

- Perkins Technology Funds
- State Technology Funds
- Edison Schools

Project Summary

The Detroit Urban Systemic Initiative (DUSI) is a district-wide, 5-year effort to bring about major education reform in mathematics and science in Detroit Public Schools. DUSI is designed to impact all 178,828 Detroit Public Schools students, including students with special needs. Detroit will implement strategies aimed at changing the cognitive patterns that impede student achievement in mathematics and science.

Professional development will begin with awareness, and progress to raising expectations, student achievement, developing staff skills and knowledge, building confidence, obtaining and upgrading credentials. District-wide policy changes will enable equal access, flexibility and latitude for systemic reform and targeting resources.

Organizational changes include staffing assignment, designating K-12 constellations (high school, middle schools, and elementary feeder schools) as learning communities in which staff plan, train, and make articulation decisions; increasing the number of specialists and certified minority male mathematics and science teachers; and making state-of-the-art facilities and equipment accessible for all students.

Delivery system changes included distance learning; professional practitioners as teachers; learning logs; constructivism, problem-based and hands-on instruction; real-world applications and educational settings outside the classroom; implementation of improved K-12 core curriculum; community collaborations and partnerships; parent programs; career counseling; and adoption of exemplary programs to meet gaps in enhancement and intervention programs. Teachers of mathematics and science will receive professional development and training.

Changes in assessment practices include performance-based assessment with student portfolios that follow students and new standardized norm-referenced tests. The 5-year evaluation design developed by Wayne State University will be significant in the decision-making process.

Project Goals

- Provide the mathematics and science fundamentals to empower all students to participate fully in a technological society.
- Improve the mathematics and science literacy of Detroit Public Schools students.
- Enable a significantly greater number of Detroit students to pursue careers in mathematics, science, engineering, and technology.
- Facilitate a district-wide climate for systemic change that continually assures adoption and maintenance of strategies and programs that enable all students equal access.

Primary Decision Making Body

Standards Curriculum	State
Curriculum/TextBook Adoption	District
Student Assessment	State
Professional Development	State
Resources	State
Teacher Hiring	District
Teacher Contracts	District
Certification & Re-certification	State
Graduation Requirements	District
School-Based Management?	Yes

Policies Promoting Equal Access by All Students in High Quality Education

Student Tracking:	All Remedial Courses eliminated
Criteria for Entry into High Level Mathematics and Science Courses:	Prerequisite courses programmed
Availability of High Level Courses:	

Special Education and Bilingual Students:
 Career Preparation System integrates math, science and careers in schools with resource rooms

Policies Impacting the Enrollment of Students in Challenging Math and Science Courses

Attendance : Attendance standards for promotion

Guidance:

Student Support Systems:
 Saturday, after school and summer programs designed to strengthen students in need of support

Others:
 Summer academies at Wayne State University for middle school students, Michigan State University for secondary school students

Policies Relevant to Curriculum

Framework:
 Revised Core Curriculum Frameworks with specific performance indicators for every grade level

Curricula:

Curricula Materials:

- MI CLIMB
- Teachers Teaching with Technology
- MARS
- Summer Success Math
- Connected Mathematics Program
- TERC Investigations
- Jasper Woodbury
- STC, Science Technology for Children
- Carnegie Cognitive Tutor
- FOSS
- Model It
- Insights
- MI Big
- Science Videodiscivity
- Science Sleuths
- State of Michigan Lessons

- Project Based Science Probes
- Atlas for Science Literacy

New Courses Added as a Result of USI:
 Instructional Time:
 Increased graduation requirements
 Time allocations put in place and made mandatory

Others:
 Articulation Guide (K-12) to ensure continuity in course work across grades in school constellation

Standards-based Curriculum and Instruction

Standards Adopted:
 State and National Standards

Primary Instructional Strategies:

% of Students Experiencing Standards-based Mathematics Curricula:

% of Students Experiencing Standards-based Science Curricula:

E: 100%
 M: 100%
 H: 100%
 E: 100%
 M: 100%
 H: 100%

Policies Relevant to Teacher Qualifications

Certification:

- K-5 All subjects
- 6-8 Major/minor
- Probationary status

Requirement & Hiring Practices:
 Permanent status requires additional course work
 Alternative Paths to Certification program (APT)
 Limited License to Instruct (LLI) programs

Professional Advancement & Leadership Training:
 Contract Requirements:

E: Elementary School M: Middle School H: High School

Detroit USI

Professional Development Policies and Practices

USI Leadership, Governance, and Management

Evaluation Instruments:

Time Required or Supported: 51 hours per year is required

Superintendent:

Professional Development Alignment to Content Standards Measures:

Teacher's Instructional Practices Evaluation: By content supervisors, Department Unit heads, principals

Financial Resources Provided:

- Stipends
- Mini-grant program
- Workshop payment

• Conferences provide feedback

Impact on Student Achievement: Yes, data by item and strands are provided by student, classroom teacher and school for the local assessment (ESAT) and state assessment (MEAP)

USI Office:

- Project Director is the chief of Curriculum Development and Related programs
- Project Director reports to the Chief Academic Officer

Policies Relevant to Standards-based Assessments

Alignment to Curricula Standards: Yes, the strategies are developed based upon from the state assessment (MEAP); District Assessment (ESAT) Survey data, case studies, current research and site based needs.

Extent to Which Assessments are Aligned to District Standards and Curriculums: Yes

Community Key Personnel:

Teacher Leaders: Peer Coaches

Methods stakeholders are informed of goals, objectives and accomplishments of assessment program: Family Math and Science Activities, Parent Workshops, Science Fair handbook, Classroom volunteerism

Measurement of Impact: Peer coaching and supervisor observation reports

Other: University Courses

- District Inservice Training
- Peer coaching

Type and Amount Received by Average Math/Science Teacher: Constructivist teaching based

Detroit USI

Project Information

USI Project Title : El Paso USI
Cohort: 93 (Sept. 94 - Aug. 00)
USI Web Site:

Project Summary

Over the past 5 years, the El Paso community has been intensively engaged in an effort to systematically renew education toward assuring academic success for every youngster in our region. This has been a multifaceted effort at the K-12 level, focused in particular on building the capacity of schools to offer a high-quality mathematics and science curriculum and instruction program to all students, and turning around low achievement patterns in those key subject matter areas among our largely minority and poor student population. The El Paso Urban Systemic Initiative funding from the National Science Foundation focused attention on mathematics and science and provided the resources for leveraging funding and collaboration from all partners and for documenting change.

99-00	Schools	Teachers	Students
K-G5 (Elementary)	96	4,072	66,537
G6-8 (Middle)	28	457	22,244
G9-12 (High)	16	798	30,396
Total	140	5,327	119,177

Population Reached: Our goal is to reach all of the approximately 8,500 teachers and their students in the El Paso area. From a global change perspective, all students and teachers have been reached through the development of local science and mathematics standards based on national standards and the dissemination of these standards to every classroom in the area. However, that is only part of the effort of making the standards realized in standards-based curriculum and instruction that reaches all students. The El Paso effort began at the elementary school level where currently 30 percent of the teachers have been directly reached in on-site standards-based instruction initiatives and most others indirectly reached. In the past year the onsite effort has moved to the middle school and high school level where the work has just begun.

Multifaceted Strategies: Policy changes include: (1) the development of community standards (benchmarks for grades 4, 8, 12) based on national standards in mathematics and science, (2) teacher preparation curriculum reform at the University of Texas at El Paso under a Department of Education grant for the University's El Paso Partnership for Excellence in Teacher Education (PETE), (3) new graduation requirements (e.g., all students must pass Algebra I, Geometry, and Algebra II), (4) parallel university admission requirements, and (5) regular review of student data at the level of the superintendents and their staffs to evolve understanding of outcomes and generation of appropriate policy.

Project Goals

- To improve the scientific and mathematical literacy of all students in the community.
- To provide to all students a high-quality mathematics and science education that will permit them to participate fully in a technological society.
- To enable a significantly greater number of these students to pursue careers in mathematics, science, engineering, and technology.

Project Summary

Improving Science and Mathematics for All Students is the Dade County Public School's 5-year USI plan incorporating each of the six regions of the District. The plan focuses on strengthening content and instruction, extending current school improvement processes, removing barriers to promote equity and excellence, and establishing community partnerships to link mathematics and science learning with the real world. The initiative combines NSF funding with Dade County resources from the Eisenhower program, Title I, Title VI, Project Phoenix, staff development and instructional technology funds, and financial and in-kind contributions from the community. During the third year of implementation, the Dade USI is designed to impact every school and every student through a coordinated, cluster-based approach.

Project Goals

1. Strengthen content and instruction, and enhance student learning through challenging standards-based curricula; quality, research-based programs in schools; rigorous, well-taught courses for teachers; and academic acceleration for students.
2. Extend School Improvement Plans (SIP) to include mathematics and science goals and strategies that assist teachers and schools to improve learning and achievement.
3. Align district policies that will remove barriers, coordinate resources, and establish equitable policies and practices in school mathematics and science.
4. Make connections with community partners that link mathematics and science to real-world issues and careers, and initiate support strategies for students.

Cohort/Scale-Up Approach

	94-95	95-96	96-97	97-98	98-99	99-00
Number of District Schools**	284	284	284	284	284	305**
USI Schools**	98	183	282	284	284	305
% Schools:	35%	64%	99%	100%	100%	100%

*98-99 Core Data Elements, 2000 Report; ** K-1 2001

Primary Decision Making Body

Standards Curriculum	District
Curriculum/TextBook Adoption	District
Student Assessment	State
Professional Development	School
Resources	District
Teacher Hiring	School
Teacher Contracts	District
Certification & Re-certification	State
Graduation Requirements	District
School-Based Management?	Yes

Policies Promoting Equal Access by All Students in High Quality Education

Student Tracking:	Basic level courses in mathematics and science eliminated
Criteria for Entry into High Level Mathematics and Science Courses:	All middle school students must pass mathematics and science each year in order to be promoted All students should pass Algebra I by G9
Availability of High Level Courses:	Gate keeping courses of Algebra I and Earth/Space Science required of all students

Special Education and
Bilingual Students:
Others:

The SECME (Science, Engineering, Communications, Mathematics; Enhancement) program is in 83 schools and encourages students to take challenging high level courses.

Schools must define student achievement goals in mathematics and science; principals held accountable

- EOA Earth Systems
- The Balanced Assignments
- Everyday Mathematics
- Science and Technology for Children (STC)
- AP Environmental Science
- Honors Calculus and Honors Physics
- Flexible scheduling
- Block schedules
- Extended day schedule
- Extended year schedule
- School to Work programs required at all levels

Others:

Policies Impacting the Enrollment of Students in Challenging Math and Science Courses

Attendance : A secondary student with 10 or more unexcused class absences in an annual course or 5 or more unexcused absences in a semester course is subject to failure

Guidance: Counselors have been involved in professional development inservices which focused on the need to encourage all students to enroll in high-level courses

Student Support Systems:
Before and after school tutorial programs
Summer immersion courses for K-G8 students
Accelerated mathematics and science summer programs for G6-12
Saturday student enhancement programs

Policies Relevant to Curriculum

Framework: Florida Sunshine State Standards
Curricula: Connected Mathematics
Materials: Mathematics in content

Standards-based Curriculum and Instruction

Standards Adopted: Florida Sunshine State Standards

Primary Instructional Strategies:
Use of calculators encouraged
Kit-based science curriculum
Integration of Math/Science

- Manipulatives used in the classroom
- Cooperative learning
- "Mathematics in Context" strategies/activities
- Emphasis on constructive teaching strategies
- Product based teaching
- Geometry Sketchpad software
- Use of technology
- Less emphasis on lecture

% of Students Experiencing Standards-based Mathematics Curricula:
E: 100%
M: 100%

% of Students Experiencing Standards-based Science Curricula:
E: 100%
M: 100%
H: 100%

E: Elementary School M: Middle School H: High School

Professional Development Policies and Practices		Type and Amount Received by Average Math/Science Teacher:	<ul style="list-style-type: none"> Teacher leader meetings All math and science activities coordinated/ approved by USI staff Feeder pattern professional development Investigative "hands-on" kit Content-based mathematics Teaching strategies Workshops Professional Development sessions on using technology as a learning resource Emphasize hands-on, inquiry based instruction Developing Science Inquiry teaching Individual teacher-classroom assessment including: profiles, interview, journals, written & oral testing, projects, and group activities CBC correlated to Florida Sunshine State standards 	USI Leadership, Governance, and Management	
Time Required or Supported:	<ul style="list-style-type: none"> Elementary school students released 1 hour early each week Secondary school students released 2 hours early each month Substitute days provided to teachers attending all USI workshops 3 or more days 	Evaluation Instruments:		Superintendent:	<ul style="list-style-type: none"> Made math and science a priority for school improvement accountability Active participant in PI/PP meetings Executive committee member of USP Superintendent's coalition Proposed policy changes to require Algebra by grade 9, Geometry by grade 10 and a science sequence of Earth-Space Science, Biology, Chemistry or Physical Science
Urban Systemic Initiatives (USI)		Professional Development Alignment to Content Standards Measures:		Urban School Key Indicators of Science and Mathematics Education	

Miami-Dade USI

USI Office:	<ul style="list-style-type: none"> • School site USI Teacher Consultants appointed • Educational specialists employed • USI and Division of Mathematics and Science combined into one division • Coordination with school principals, feeder patterns and region offices • Focus of government leaders on One Community One Goal work force development agenda • Mathematics and Science emphasized for key industries 	Higher Education:	<ul style="list-style-type: none"> • University of Miami • University of Miami's Rosentiel School of Marine and Atmospheric Science • Florida's International University • Southeastern Consortium for Minorities in Engineering (SECME) • Urban League 	1996-97	<ul style="list-style-type: none"> • All middle school students must pass math and science course each year in order to be promoted • All students should have successfully completed Algebra I, by the end of grade 9
Community Key Personnel:	<p>Policy Changes to Support Student Success in Math and Science During USI Implementation</p>	1997-98	<ul style="list-style-type: none"> • Mathematics Student Performance Standards was established to identify students who fail to meet performance indicators. A Student Performance Plan (SPP) must be developed for student who performed "Below Proficiency" and that student must be provided • Schools are required to conduct parent conferences for students identified as not meeting the district performance standards in mathematics • No changes reported 		
Partnerships	<p>Other Key Initiatives:</p> <ul style="list-style-type: none"> • Eisenhower integration with Professional Development Programs • School to Work • Miami Museum of Science- internet technical training for teachers and staff • Everglades National Park Service- professional development for teachers and an interactive ecology program for students • Zoological Society for South Florida- interactive hands-on science program for students 	1998-99 1999-00 2000-01	<ul style="list-style-type: none"> • Algebra I made a graduation requirement • Full year of science required for all 6th graders • Basic level courses in mathematics were eliminated per state frameworks • Basic level classes in science were eliminated per district mandate • Schools must include mathematics and science objectives in their School Improvement Plan • The use of test scores to determine enrollment in higher level courses no longer permitted • Textbook adoption process limited to a select number of high quality, standards-based selections 		<ul style="list-style-type: none"> • All middle school students must pass mathematics and science courses each year to be promoted. • Biology and Chemistry or Physical Science required for graduation. • Earth/Space Science replaces Physical Science as the required 9th grade science course. • Two year Algebra I course eliminated • Geometry required for graduation, enrollment by grade 10.

Miami-Dade USI

Curriculum and Instruction Changes to Support Student Success in Math and Science During USI Implementation

School Year	Policy Implemented
Before USI	<ul style="list-style-type: none"> • Traditional instruction and assessment • No frameworks or standards defined
1994-95	<ul style="list-style-type: none"> • Development of curriculum frameworks- Competency Based Curriculum (CBC) • State level frameworks mandated: Sunshine State Standards
1995-96	<ul style="list-style-type: none"> • All elementary schools implementing National Council of Teachers of Mathematics (NCTM) standards-based curriculum • All middle schools implementing standards-based "Comprehensive Science" curriculum
1996-97	<ul style="list-style-type: none"> • Math and Science Competency Based Curriculum (CBC) revised to align with content & pedagogy of National Science Educational Standards
1997-98	<ul style="list-style-type: none"> • Math and science CBC revised to include new Florida Sunshine State Standards • Focus of instruction is implementation of standards, with textbooks used as tools to achieve standards
1998-99	<ul style="list-style-type: none"> • Math and Science CBC revised to include new Florida Grade Level Expectations (GLE); Grades K-8, based on the Sunshine State Standards

Professional Development Policy and Program Changes to Support Teachers During USI Implementation

School Year	Policy Implemented
Before USI	<ul style="list-style-type: none"> • Most elementary school teachers had only one math or science content course in pre-service program. Many of the teachers did not feel comfortable with course content (very little to no inservice education for elementary science).
1994-95	<ul style="list-style-type: none"> • Essential Components for Effective Mathematics, Science, and Instructional Technology Programs for Dade County Public Schools- models for curriculum • Emphasis on standards-based curriculum
1995-96	<ul style="list-style-type: none"> • All programs based on Competency Based Curriculum (CBC) developed in SY 1994-95
1996-97	<ul style="list-style-type: none"> • Direct Eisenhower funds to feeder patterns for collaborative professional development • Elementary students released 1 hour early each week • Secondary students released 1 hour early each month (The early releases allow professional development sessions during regular school hours) • Florida State University Master's or Specialist's Degree in Math/Science Education for elementary and middle school teachers
1997-98	<ul style="list-style-type: none"> • Principal Institute Implemented
1998-99	<ul style="list-style-type: none"> • Increased participation of paraprofessionals in professional development programs • Professional Development will be integrated with Program /School Improvement Plans
1999-00	<ul style="list-style-type: none"> • ESE & Bilingual teachers receive high content professional development activities. Teaching strategies for use with ESE & Bilingual students have been incorporated into the training. All Title VI grants require participation. • Counselors have been involved in professional development inservices which focused on the need to encourage all students to enroll in high level courses

Standards-based Assessment System Changes During USI Implementation

School Year	Policy Implemented
Before USI	<ul style="list-style-type: none"> • Local assessment is Stanford Achievement Tests, G2-12
1994-95	<ul style="list-style-type: none"> • No changes reported
1995-96	<ul style="list-style-type: none"> • Classroom Assessment Items based on Competency Based Curriculum (CBC)
1996-97	<ul style="list-style-type: none"> • High School Competency Test (HSCT)

Project Summary

The New York City Urban Systemic Initiative (NYC USI) is a collaboration among the Board of Education of the City of New York, The City University of New York, and the National Science Foundation. The program works with the 32 community school districts, the 6 high school superintendencies, and the 2 central districts to improve the mathematics and science achievement of all students. To achieve this goal, NYC USI helps school districts identify and utilize those curricula and professional development programs that are based on the best current knowledge about teaching and learning and have undergone a rigorous research and development process; develops partnerships with all stakeholders in support of standards-based mathematics and science instruction for all students; and provides professional development to sustain implementation of standards-based curricula.

Project Goals

To assist the school system in identifying and adopting policies that support high-level science and mathematics instruction for all students and to build system capacity to undertake the needed reforms in these curricular areas. Given the decentralized structure of the New York City school system, it is necessary for the policy reform at the system level to be complemented by reformed district policies that address instructional paradigms, assessment, and professional development.

To work with all participants to forge a common vision of mathematics, science, and technology teaching and learning, engage in professional development that enhances the capacity of participants to undertake the new programs and build a policy base to sustain the programs

Teacher Contracts District

Certification & Re-certification State

Graduation Requirements State

School-Based Management? Yes

Policies Promoting Equal Access by All Students in High Quality Education

Student Tracking: Regents Examinations for enrollment in Regents special courses

Criteria for Entry into High Level Mathematics and Science Courses: All students required to meet high standards and take Regents Examinations

Availability of High Level Courses: Regents Courses available to all students

Special Ed. & Bilingual Stud.: Standards same for all students

Policies Impacting the Enrollment of Students in Challenging Math and Science Courses

Attendance: Mandatory attendance

Guidance: Efforts to have students enroll in high level mathematics and science courses

Student Support Systems: Mathematics and Science Institute

Peer and co-curricula tutoring

Teacher parent conferences

Others: Summer school for those not meeting promotional standards (K-12)

Tutoring in regents, math and science afterschool and on Saturday

Family math and science programs

Policies Relevant to Curriculum

Framework: New York State Standards and Frameworks

Curricula: New York State Regents Curricula

Curricula: Algebra Project

Materials: Connected Mathematics Project (CMP)

Everyday Mathematics

Mathematics in Context (MIC)

Mathland

Interactive Mathematics Program (IMP)

Investigations in Number, Data, and Space (TERC)

Insights

Full Option Science System (FOSS)

Science Improvement Curriculum Study (SICS)

Science Education for Public Understanding (SEPUP)

Science and Technology for Children (STC)

Mathematics, A Way of Thinking

None reported

New Courses Added as a Result of USI:

Instructional Time:

State Requirement: 330 minutes of instruction daily (5.5 hours)

Standards-based Curriculum and Instruction

Standards Adopted: Regents Assessment System (including Living Exams and Physical Setting)

Primary Instructional Strategies: E: Hands-on and inquiry-based

M, H: Project-based

Student focused developmental lessons

% of Students Experiencing Standards-based Mathematics Curricula: E: 12% M: 8% H: 4%

% of Students Experiencing Standards-based Science Curricula: E: 29% M: 15% H: 15%

Policies Relevant to Teacher Qualifications

Certification: Teachers with a bachelor's degree and state certification can obtain a 4 year NYC provisional certificate

Requirement & Hiring Practices: National and international recruitment

Professional Advancement & Leadership Training: Must meet state and NYC Board of Education certification requirements

Contract Requirements: Collective bargaining agreement between NYC Board of Education and the United Federation of Teachers

*E: Elementary School M: Middle School H: High School

Policy Changes to Support Student Success in Math and Science During USI Implementation		Curriculum and Instruction Changes to Support Student Success in Math and Science During USI Implementation		Professional Development Policy and Program Changes to Support Teachers During USI Implementation	
School Year	Policy Implemented	School Year	Policy Implemented	School Year	Policy Implemented
Before USI	•New York City (NYC) Division of Instruction and Professional Development worked with New York State Education Department officials to coordinate Mathematics and Science policy	Before USI	•NYC Board of Education is required to implement the New York State curriculum for mathematics and science.	Before USI	•There were citywide, district and school professional development programs
	•State Mentoring Mathematics/Science/Technology (MST) Network collaborated with NYC Board of Education	1994-95	•Chancellor required 3 Regents mathematics and Regents science for graduation (local diploma)		•Coordinated by central NYC Board of Education Division of Instruction and Professional Development
	•NYC District Mathematics and Science Coordinators		•NYC implemented its curriculum framework	1994-95	•Formation of Science Leadership Institutes
1994-95	•Professional Development for K-G12 teachers		•New York state implemented its learning standards	1995-96	•Formation of Mathematics Leadership Institute
	•NYC Chancellors Mathematics and Science Initiative: 3 Years each mathematics and science required for a Local Diploma	1995-96	•Series of Mathematics Leadership Institutes in collaboration with National Science Resource Center	1996-97	•Introduction of selected exemplary curricula and related professional development
1995-96	•New York State New Governance Legislation gives the Chancellor broader authority over NYC Community School Districts	1996-97	•Chancellor is given more power over the 32 community school districts.	1997-98	•NYC USI citywide summer professional development courses, workshops and institutes with emphasis on standards-based curricula and performance standards
1996-97	•Chancellor's designation of NYC USI as organizational and driving force for MST reform		•A district Comprehensive Educational Plan is required as an adjunct to superintendent's contract.		•Students setting Mathematics Standards
	•Adoption of New Standards Performance Standards for Mathematics and Science (i.e. calibration, awareness and professional development)		•Board of Education adopted New Standards Performance Standards for language arts, mathematics, science and applied learning	1998-99	•Expanded professional development including Texas Instruments' Mathematics Teacher Enhancement Institutes
		1997-98	•Alignment of Mathematics Performance Standards with New York State Learning Standards and National Council of Teachers' of Mathematics Standards		•Students Setting Science Standards
1998-99	•New Regents Examinations for Mathematics and Science required for diploma		•Completion and distribution of NYC Mathematics Performance Standard Manual to all teachers and administrators in system		•Focus is on standards-based curricula and new standards. Performance standards on mathematics & science.
		1998-99	•Completion and distribution of NYC Sciences Performance Standard Manual to all teachers and administrators in system

Project Information

USI Project Title : Phoenix USI
 Cohort: 93 (Sept. 94 - Aug. 99)
 USI Web Site: www.dist.maricopa.edu/eddev/phxusi/

Project Summary

The Phoenix Urban Systemic Initiative (Phoenix USI) project will reform the teaching and learning of science, mathematics, and technology in 87 elementary (K-8) schools and 8 high schools in the Phoenix inner city. The USI system, composed of 9 school districts serving 85,000 students, Arizona State University, state and municipal agencies, community-based organizations, the Arizona Science Center, business and industry, parents, and other members of the learning community, will create a culture for learning and change in which all students are mathematically, scientifically, and technologically competent to function successfully in the 21st century. This is being accomplished by developing, instituting, and maintaining supportive activities that empower the entire learning community to facilitate and enable ongoing systemic change.

Primary strategies are : (1) curriculum reform and implementation and (2) professional development for all science and mathematics teachers.

The initiative uses a facilitated joint governance model to achieve its benchmarks. The Phoenix USI is organized into six major programmatic components: (1) Curriculum/Instruction Alignment, (2) Professional Development, (3) Instructional Support, (4) Cross-Jurisdictional District Education Linkages, (5) Parent Involvement, and (6) Business/Industry and Community Linkages.

Project Goals

- ♦ To improve the scientific, mathematical, and technological literacy of all students in Phoenix urban schools.
- ♦ To provide the mathematics and science fundamentals that will permit all students to participate fully in a technological society.
- ♦ To enable a significantly greater number of these students to pursue careers in mathematics, science, engineering, and technology.
- ♦ To produce systemic reform in science, mathematics, and technology education through fundamental, comprehensive, and coordinated change that will improve outcomes for all students.

Urban Systemic Initiatives (USI)

I-156

Urban School Key Indicators of Science and Mathematics Education

Phoenix USI

Professional Development Policies and Practices		USI Leadership, Governance, and Management	
Time Required or Supported:	Teacher's Instructional Practices Evaluation:	Superintendent:	•1994-97: Council of Superintendents Management Leadership Team (MLT) One superintendent served as Co-PI Community college vice chancellor served as PI
Financial Resources Provided:	• Almost \$50 million in district, state and federal funds realigned to support math, science, technology		•1997-99: Council of Superintendents and Management Leadership team (MLT) consolidated in 6/97 to form Unitary Management Team which met monthly to discuss and approve project activities In Year 3, Rene Diaz, Phoenix Union High School District superintendent became PI and two elementary superintendents became Co-PI's
Alignment to Student Standards:	• All Professional Development aligned to national math/science standards		
Measurement of Impact:	Impact on Student Achievement:		
Other:	• Administrators (principals and assistant principals) engaged in professional development • Professional Development continually revised to meet content and pedagogy needs with 75% of all teachers engaged • Focused on specific content and pedagogy; delivered both system-wide and school-based • Offered in 45 - 75 hour modules • Technology training • Cognitively Guided Instruction • Horizon Research Inc (HI) classroom observation protocols • Concerns-based Adoption Model (CAM) Levels of Use interviews • School Profiling protocols • Professional Development surveys • University-district teams review curriculum/standards • Outside technical assistance review in mathematics		
Type and Amount Received by Average Math/Science Teacher:	Extent to Which Assessments are Aligned to District Standards and Curriculums:		
	• 33% of G8 curriculum aligned with Stanford Achievement Test (SAT-9) • California Systemic Initiative Assessment Collaborative (CSIAC) totally aligned with standards		
Evaluation Instruments:	Methods stakeholders are informed of goals, objectives and accomplishments of assessment program:	USI Office:	•1994-97: Dr. Ernest Ramirez, Jr., (Director of CRCM) is Project Director •1997-99: Dr. Susan Holt-Maas appointed as Project Co-Director, 9/97 District curriculum leadership assumed much of work previously done by USI specialists
Professional Development Alignment to Content Standards Measures:	Community Key Personnel:		• Key personnel from business and Arizona Science Center serve on Unitary Management Team
	Teacher Leaders:		• Collaborative Peer Teachers

Policy Changes to Support Student Success in Math and Science During USI Implementation

School Year	Policy Implemented
Before USI	• No specific policies supporting standards-based mathematics and science
1994-95	• No changes reported
1995-96	• No changes reported
1996-97	• Discontinue 9th grade mathematics placement test given in the 8th grade
1997-98	• Adopted policies that support full implementation of the Unitary Curriculum K-12 in science and mathematics • Adoption of specific policy "Mathematics, Science and Technology" • Recruit, hire and retrain teachers who demonstrate the behavior and practices aligned to Unitary Curriculum requirements • Graduation Requirement: student must pass state Arizona's Instrument to Measure Standards (AIMS) test in reading, writing and mathematics
1998-99	• Increase graduation requirement from 2 years of mathematics to 3

Curriculum and Instruction Changes to Support Student Success in Math and Science During USI Implementation

School Year	Policy Implemented
Before USI	• Standards-based curriculum not defined or articulated across districts • No common policies across districts supporting standards-based mathematics and science
1994-95	• No unitary curriculum content or pedagogy • No standards-based instructional materials common across districts • No changes reported
1995-96	• No changes reported
1996-97	• Adoption of K-12 unitary, standards-based curriculum in mathematics and science
1997-98	• K-12 Standards-based curricula implementation based on: National Council of Teachers of Mathematics Standards, National Science Education Standards, AAAS Benchmarks for Science Literacy, and Arizona Department of Education Academic Standards • Adoption and implementation of standards-based mathematics and science instructional materials
1998-99	• No changes reported

Phoenix USI

Professional Development Policy and Program Changes to Support Teachers During USI Implementation		Standards-based Assessment System Changes During USI Implementation	
School Year	Policy Implemented	School Year	Policy Implemented
Before USI	<ul style="list-style-type: none"> Each district held its own professional development workshops mostly focusing on instructional strategies in mathematics Little or no hands-on science professional development was occurring Not much focus on content Professional development often centered on implementing current instructional materials 	Before USI	<ul style="list-style-type: none"> No common assessment practices across districts State testing program: <ul style="list-style-type: none"> Fall: G4, 7, 10 (Iowa Test of Basic Skills) Spring: G3, 8, 12 (Reading/Mathematics/Writing Performance Assessments)

About USI and KIDS

In 1994, NSF launched the Urban Systemic Initiative (USI) program, applying lessons learned from its initial State Systemic Initiative (SSI) program to the problems of inner-city school systems. The USI program was offered to major cities with the largest number of K-12 students living in poverty. Five cohorts of cities signed cooperative agreements with NSF for a five-year concerted system-wide effort to promote standards-based reform in mathematics, science, and technology (MST). The NSF investment was meant to be a catalyst for large-scale educational change affecting standards, curriculum, assessment, professional development, partnerships, and convergence of intellectual and fiscal resources, with constant attention to improving student achievement. NSF's focus on results has become even stronger following passage of the Government Performance and Results Act (GPRA). Over the course of its systemic initiative programs, NSF has developed a theoretical structure for systemic reform that is based on six "drivers" including four process drivers and two student outcome drivers, as well as a number of cross-cutting issues such as equity, quality, scaling up, coordination and organization.

Systemic Research, Inc. received a three year grant to explore the impact of the NSF's USI program on student achievement and the learning infrastructure in urban school districts by examining relationships among the process drivers (factor, or independent variables) and outcome drivers (system output, or dependent variables). The intent was to establish an inferential causal structure that allows reasonable attribution of impacts to program elements. Results of the study allow broader dissemination of successful systemic initiative models based on a "reverse engineering" approach.

As a vital instrument for systemic analysis, our evaluative study team developed a Key Indicator Data System (KIDS) to collect comprehensive annual core data using both quantitative (K-1: focused on demographics, student outcomes, and teacher preparations) and qualitative (K-2: focused on policies relevant to six drivers) templates. KIDS was tailored to each cohort/site due to the differences in USI timelines, curriculum structure, and student assessment systems.

With the cooperation from 22 USI sites (PIs/PDs, data managers, and local evaluators), as well as collaboration from the Educational Testing Service, The College Board, and ACT, Inc., our study team completed KIDS data collection. The qualitative data was also compiled/extracted from the individual Annual Reports and PER documents collected from all 22 sites during the project period.

The three-volume Urban School Key Indicators of Science and Mathematics Education: 2001 presents the essence of each USI's progress based on KIDS-1999, 2000, and 2001 from each site's baseline year to SY 1999-00. This report replaces Urban School Key Indicators of Science and Mathematics Education: Based on Key Indicator Data System (KIDS-1999), Volumes I-IV.

Please refer to our evaluative study web site <http://www.systemic.com/usi> or the Systemic Initiative (SI) study group web site <http://www.sistudyforum.org> for details of study progress and available electronic version of various study reports.

USI Project Title : Cleveland USI
Cohort: 94 (Sept. 95 - Aug. 00)
USI Web Site:

Project Summary

Cleveland's Urban Systemic Initiative (CUSH) is the mathematics and science component of a Blueprint for Change and VISION 21, the district's master plan for educational improvements. The purpose of the initiative is to reform the district's mathematics, science, and technology education program for grades K-12 and to close the achievement gap between Cleveland's students and those of neighboring school districts. To achieve its goals, Cleveland has targeted eight areas for reform.

Urban Systemic Initiatives

These areas form the components of Cleveland's operational plan:

Component 1. Data Management Component 2. Policy and Regulations Alignment Component 3. School-Site Leadership
Component 4. Alignment of Curriculum, Instruction, and Assessment Component 5. Student Outcomes
Component 6. Student Support Systems Component 7. Professional Development for All Teachers and All Administrators
Component 8. Collaborations with Parents and Community Partners

Project Goals

- ◆ To develop a coordinated system of data retrieval management and analysis with the various data sources in the district to support the data needs of science, mathematics, and technology (SMT).
- ◆ To identify new or amended policy recommendations to support and strengthen the district's mathematics/science technology reform.
- ◆ To strengthen school-site leadership.
- ◆ To implement a student- and problem-centered, national standards-based SMT curriculum that includes direct assessment.
- ◆ To offer an extensive student support system, enhanced by flexible scheduling.
- ◆ To provide professional development for all teachers and administrators.
- ◆ To develop collaborations with parents and other community partners.

- Graduation Rate

USI Leadership, Governance, and Management

Time Required or Supported:

- Three student non-attendance days
- USI substitutes provided for site-based professional development

Superintendent:

- District under Mayoral control since 9/9/98
- Chief Executive Officer appointed 11/16/98
- School Board: 2 regular members and 2 ex-official members

Financial Resources Provided:

- Eisenhower Funds
- Title I funds
- Educational Technology funds: SchoolNet, Project Neat, Joyce Grant, Alliance +

USI Office:

- Principal Investigator is Chief Executive Officer
- Project Director reports directly to Chief Executive Officer and Chief Academic Officer

Impact on Student Achievement:

- Scores of proficiency tests by classroom using aggregate results

Policies Relevant to Standards-based Assessments

Alignment to Student Standards:

- Aligned with State Proficiency Learning Outcomes

Extent to Which Assessments are Aligned to District Standards and Curriculums:

- Data based on test results drive the curricula and instruction
- 99.9% aligned

Measurement of Impact:

Other:

Type and Amount Received by Average Math/Science Teacher:

- Professional Development office is created
- Urban Teacher's Academy
- Instructional Alignment training and implementation

- Co-PI's are Chief Academic Officer, Director of Curriculum and Instruction, and Director of Career/Applied Technologies
- Urban Systemic Initiative Transformation Team provided leadership for overview and change

Community Key Personnel:

- Ohio Department of Education web site

- Must Improve Mathematics and Science (MIMS): 20-60 hours

- SchoolNet: 60 hours regarding educational use of computers

- Inquiry-based education

- Implementation of standards-based curriculum

- Lead teachers work with peer on site

- New textbook adoption

- Use of graphing calculator as a tool in instruction

Teacher Leaders:

- Lead Teachers

Project Information

USI Project Title : Columbus USI
 Cohort: 94 (Sept. 95 - Aug. 00)
 USI Web Site: www.columbus.k12.oh.us/usi/index.html

Project Summary

The Columbus Public School District is implementing dramatic changes in the way the district supports student learning of science and mathematics in grades K-12. The district's comprehensive systemic improvement plan sets high achievement standards for all students and provides an enhanced support structure and integrated community involvement to ensure that students can successfully meet those standards. Under Columbus' improvement plan, all students are exposed to the new integrated science and mathematics curriculum that focuses on helping students understand concepts and applications to real-world situations. In the proposed adoption of higher performance standards, all students will be required to complete 12 years of mathematics and science. In addition, alternative assessment tools ensure that all students acquire required skills prior to promotion or graduation. The district has established community-based Mathematics and Science Centers to provide supportive and enrichment activities for all students outside of school hours. The utilization of technology in the classroom has begun to enable student teachers throughout the district to access mathematics and science resources.

To strengthen leadership and accountability, the teaching and administrative staff work collaboratively to facilitate innovative instruction and learning in mathematics and science through the creation of building-level teams and implementation plans. Professional development activities are focused at both the building level and through an extensive array of district professional development inservice and course offerings. The USI schools are scheduled to participate in a district-wide reform effort through the Urban Academy for Professional Development and School Renewal. To support a shared vision of change and improved learning in mathematics and science for all students, a cadre of teacher leaders work day to day in the elementary and middle schools to support mathematics and science teachers, involve parents, and model instruction in the classroom. The district has a strong commitment to community partnerships and shared resources to support mathematics and science.

Project Goals

- To reengineer the mathematics and science curriculum to produce one that is aligned with national and state standards.
- To provide high-quality professional development through building-based and district activities, including support from the Urban Academy for Professional Development and School Renewal.
- To integrate advanced technology throughout the district for use in classroom instruction and to network teachers, students, and community partners.
- To provide building-based instructional support to students, teachers, and parents through the utilization of mathematics and science teacher leaders.
- To strengthen leadership and accountability in the buildings through the identification of teams consisting of teachers, administrators, parents, and community members to develop implementation plans leading to improved learning for all students.

Primary Decision Making Body

Standards Curriculum	State
Curriculum/TextBook Adoption	District
Student Assessment	State
Professional Development	District
Resources	District
Teacher Hiring	School
Teacher Contracts	District
Certification & Re-certification	State
Graduation Requirements	District
School-Based Management?	Yes

Policies Promoting Equal Access by All Students in High Quality Education

Student Tracking:	-Commitment to the elimination of tracking in order to provide student access to a substantive program of core academic courses.
Criteria for Entry into High Level Mathematics and Science Courses:	-All students have access to unitary curricula in mathematics and science -All students required to take algebra by G9
Availability of High Level Courses:	

Special Education and Bilingual Students:

• Instruction based upon regular curriculum with support provided as needed to ensure student success at his/her highest level

Policies Impacting the Enrollment of Students in Challenging Math and Science Courses

Attendance : • Attendance rate at a school part of their state-issued "Report Card"

Guidance: • Guidance counselors attend USI-sponsored PD in order to reinforce the need to place all student: in higher level math and science courses

Student Support Systems: • Math-Science Centers tutor and enrich students in mathematics and science

• Nationwide Insurance Co. provides summer math tutoring program for 8th graders
• The Limited tutors kindergarten students in math & reading.

Others: • College sponsored hands on math-science program for middle school student:
• Graduation requirements: By 2002, 4 years of math; By 2004, 3 years of science required

Policies Relevant to Curriculum

Framework:	•Ohio Proficiency Standards
Curricula:	•Ohio Model Curriculum in Science
Curricula Materials:	• Math Applications/Connections • Full Option Science System (FOSS) • Insights • DELTA • Algebra to Calculus • Biology, Chemistry, Physics (Glencoe) • AP (Addison, Wesley, Saunders)

New Courses Added as a Result of USI:

• Science Research Issues

• Pacesetter Mathematics (replaces Precalculus)

• Many high and middle schools use block scheduling to extend instructional time in core

Standards-based Curricula and Instruction

Standards Adopted:

• National Council of Teachers of Mathematics

• Ohio Proficiency Standards

• Science For All Americans

• Benchmarks for Science Literacy

• Hands-on

• Inquiry-based experiences

• Cooperative Learning

• Lecture

% of Students Experiencing Standards-based Mathematics Curricula:

E: 75%

M: 65%

H: 55%

% of Students Experiencing Standards-based Science Curricula:

E: 55%

M: 65%

Project Information

USI Project Title : Fresno USI
Cohort: 94 (Sept. 95 - Aug. 00)
USI Web Site:

Project Summary

The Fresno Systemic Initiative (FUSI) embraces seven key elements for systemic change; (1) develop leadership capacity at all levels; (2) reform curriculum and delivery systems; (3) align policies and practices; (4) develop student support systems; (5) implement professional enhancement strategies; (6) build partnerships with business and community; and (7) empower students and teachers with technology.

Local initiatives include: (1) establishing schools as neighborhood centers and safe havens (2) and improving mathematics, science, and technology facilities with future bond money.

Each of these elements is designed to create sweeping changes in the way that teachers teach and students learn. Strong evaluation and accountability components are in place to ensure the initiative's success. The Fresno Unified School District and the City of Fresno, in collaboration with other local agencies, are committed to establishing schools as the nerve center of the neighborhood and safe havens for children, as well as providing families with much-needed services.

Project Goals

- ♦ To improve the scientific and mathematical literacy of all students in the Fresno Public Schools.
- ♦ To prepare all students to participate in a technological society.
- ♦ To enable and encourage a significantly greater number of Fresno students to pursue careers in mathematics, science, engineering, and technology.

Cohort/Scale-Up Approach

Number of District Schools*: 95-96 96-97 97-98 98-99 99-00

94 94 94 94 106

USI Schools**: 64 81 85 85 86

% Schools: 68% 86% 90% 90% 81%

*Core Data Elements 2000-2001; ** K-1 2001

Italics: Data Imputed

Primary Decision Making Body

Standards Curriculum State

Curriculum/Textbook Adoption State

Student Assessment State

Professional Development School

Resources State

Teacher Hiring District

Teacher Contracts District

Certification & Re-certification State

Graduation Requirements State

School-Based Management? Yes

Policies Promoting Equal Access by All Students in High Quality Education

Student Tracking: The board-adopted policies eliminating remedial courses and increasing graduation requirements have severely inhibited any tracking practices

Criteria for Entry into High Level Mathematics and Science Courses: Criteria vary, dependent on school counselors and mathematics and science departments at each school

Generally prerequisite completed with C or better and/or teacher permission

Availability of High Level Courses: High level courses are available dependent on student demand

AP Probability and Statistics

Special Education and Bilingual Students: All students except Special-Day-Class are required to meet graduation requirements

Policies Impacting the Enrollment of Students in Challenging Math and Science Courses

Attendance: Attendance policy has required that students with 7 unexcused absences not receive credit for any course

Guidance: Guidance has evolved to focus on examining resources for success, since all students must meet more rigorous requirements

Student Support Systems: USI-sponsored support systems at most schools include family nights, tutorials, enrichment clubs and resource "cluster teachers"

Saturday academies

At year round elementary schools, intersession academies

Policies Relevant to Curriculum

Framework: California content standards in Mathematics and Science

Curricula:

Curricula Materials: Mathland

Investigating Mathematics

Full Option Science System (FOSS)

Glencoe Algebra Through Trigonometry

Science Education for Public Understanding (SEUP)

New Courses Added as a Result of USI: Professional Development supported by USI to prepare teachers to teach

Science 9, 10, 11

AP Probability and Statistics

Interactive Mathematics Program

No specific policies exist

Instructional Time:

Standards-based Curriculum and Instruction

Standards Adopted: California Content Standards in Mathematics and Science

National Research Council (NRC) standards

Primary Instructional Strategies: Mathematics: Investigative/Lecture/Demonstration balanced between skill and project-based

Science: Project-based, focused, spiraling curriculum

% of Students Experiencing Standards-based Mathematics Curriculums: E: 66% M: 83%

H: 100%

% of Students Experiencing Standards-based Science Curriculums: E: 47%

M: 92%

H: 100%

Policies Relevant to Teacher Qualifications

Certification: District policy requires a fifth year credential program at an accredited university. Renewal requires 150 hours of professional development every five years

Requirement & Hiring Practices: Interns in mathematics and science are hired as teachers if they have specialized in mathematics/science at the university

Professional Advancement & Leadership Training: While no official district policy exists, several hundred lead teachers have been trained over the 4 years of the initiative. Several teacher leaders have moved into key administrative positions

Contract Requirements: Teacher contracts are negotiated between the Division of Human Resources and the Fresno Teachers Association

E: Elementary School M: Middle School H: High School

Fresno USI

Professional Development Policies and Practices

Time Required or Supported: • 21, none specified for science or math

Teacher's Instructional Practices Evaluation:

- 120+ hours classroom observations each year by trained USI evaluators
- Yearly site-administrator evaluations
- Comparison of hours of professional development by the teacher with student achievement indicates a positive relationship between these variables

Impact on Student Achievement:

Policies Relevant to Standards-based Assessments

Extent to Which Assessments are Aligned to District Standards and Curriculums:

- Somewhat state assessments vary in alignment

Alignment to Student Standards: • Using the standards as a guideline for teaching has become an institutionalized part of the Fresno USD system

Measurement of Impact:

- An assessment system with accountability measures has been established, with national norms, measuring progress in normative and criterion referenced environments

Type and Amount Received by Average Math/Science Teacher:

- 5 to 10 hours
- Focused on the implementation of standards-based curriculum

Evaluation Instruments:

- Stanford Achievement Test-9
- Academic grades
- California Systemic Initiative Assessment Collaborative (CSIAAC)
- Science Embedded Assessment
- Performance Based Assessment of Mathematics
- Professional Development is designed and facilitated by Fresno Unified Curriculum Coordinators, who oversee the design and development of standards and curriculum

Professional Development Alignment to Content Standards Measures:

- Professional Development is designed and facilitated by Fresno Unified Curriculum Coordinators, who oversee the design and development of standards and curriculum

Teacher Leaders:

- Mary Lee Levy (parent)
- Nida Palmore (parent)
- Gary Sells (SDRC)
- Kelsey Stewart (parent)
- Dr. Susan Speece (FCC)
- Dr. Richard Thiesen (FPU)
- Dr. Stan Ziegler (California State University at Fresno)
- Lead Teachers

Partnerships

Other Key Initiatives:

- NSF Local Systemic Change
- NSF Fresno K-12 Higher Education Partnership
- Central Valley Science Project
- Fresno Collaborative for Excellence in Preparation of Teachers
- Science Mathematics Preservice Partnership
- Fresno Business Compact
- California State University at Fresno
- Fresno Pacific University
- University of California
- Texas Instruments
- Fresno Parks and Recreation
- San Joaquin River Parkway
- Discovery Center
- Chaffee Zoo

Community Stakeholders:

- Superintendent as of 2000-01: Dr. Santiago V. Wood

USI Office:

- Project Director 1995-96: Georgina Takemoto
- Project Director 1996-97 to 1997-98: Dr. Robert Grobe
- Project Director as of 1998-99: Ms. Sandra Carsten
- USI Administrator as of 1997-98: Ms. Carole Sarkisian-Bonard, Asst. Superintendent
- Dr. David Andrews (California State University at Fresno)
- Dr. Joe Castro (California University)

Higher Education:

- Fresno State University at Fresno
- Fresno Pacific University
- University of California
- Texas Instruments

Community Key Personnel:

- Superintendent
- Dr. David Andrews (California State University at Fresno)
- Dr. Joe Castro (California University)

Fresno USI

Policy Changes to Support Student Success in Math and Science During USI Implementation

School Year	Policy Implemented
Before USI	<ul style="list-style-type: none"> • Textbooks were adopted once each 7 years • Graduation requirements consisted of two years each mathematics and science • No special resources were used to support mathematics and science other than Eisenhower funds
1995-96	• No changes reported
1996-97	<ul style="list-style-type: none"> • Remedial, non college-preparatory courses which allowed student tracking were eliminated from the district list of course offerings • Tutoring programs/Saturday Academies in most schools • Student support mini-grants were granted to most schools in order to provide enrichment experiences for students in mathematics and science • Intersession academies at some elementary schools
1997-98	<ul style="list-style-type: none"> • Increased graduation requirements: 3 years of mathematics, including Algebra and Geometry, and three years of science for class of 2001 • Algebra I courses were split into a two-semester sequence, allowing unsuccessful students to re-take the 1st semester in the spring
1998-99	<ul style="list-style-type: none"> • School accountability goals were established for all Fresno USD schools. Each school wrote measurable goals for improving student achievement, aligned with the California accountability system
2000-01	• Summer school make-up courses

Curriculum and Instruction Changes to Support Student Success in Math and Science During USI Implementation

School Year	Policy Implemented
Before USI	<ul style="list-style-type: none"> • The mathematics and science curricula were outdated, having been last adopted in the mid-1980's • No efforts to examine the quality of mathematics/science instruction were conducted, other than the general state-mandated annual visits of site administrators to classrooms • Elementary science instruction occurred only sporadically in isolated classrooms • Full Option Science System (FOSS) adopted in 1994-95.
1995-96	<ul style="list-style-type: none"> • The District adopted the Mathland curriculum (K-G6) Investigating Mathematics curriculum (G7-8)
1996-97	<ul style="list-style-type: none"> • The Science Resource Center became fully operational. Housing over 1,000 science units, the SRC checks out units to teachers at sites in 6 week blocks, then refurbishes returned units
1997-98	<ul style="list-style-type: none"> • New high school Algebra-Geometry-Algebra II curricula was adopted from Glencoe publications
1998-99	<ul style="list-style-type: none"> • The SEPUP curriculum was implemented by teachers district-wide at G7-9

Professional Development Policy and Program Changes to Support Teachers During USI Implementation

School Year	Policy Implemented
Before USI	<ul style="list-style-type: none"> • Professional development provided by the district was sporadic • A mathematics coordinator and a science coordinator provided occasional optional professional development sessions for teachers during each year • Most teachers received little or no professional development during the year • No sequence or scope for professional development had been established • Some professional development occurred for 31 elementary schools in science during the 1994-95 year
1995-96	<ul style="list-style-type: none"> • 5 school-based coordinated professional development days devoted to mathematics and science • Full Option Science System (FOSS) professional development • 44 schools participated in mandated science professional development for each teacher (minimum of 30 hours), and 33 schools participated in mandatory mathematics professional development (minimum of 30 hours) • Year 1 training for mathematics in 33 schools consisted of a systematic look at the national standards for K-G6, participation in the California State SI for G7-8, and various curricular trainings and technology workshops for G9-12

Fresno USI

Standards-based Assessment System Changes During USI Implementation		
School Year	Policy Implemented	
Before USI	<ul style="list-style-type: none"> Assessment was limited to classroom No system was in place for measuring mathematics and science achievement in a standards-based format A locally normed- test was used by the district to determine student achievement Classroom assessment was based on the non-standards-based curricular materials available 	
1995-96	<ul style="list-style-type: none"> Fresno USD participated in the California Systemic Initiatives Assessment Collaborative (CSIAC) science assessments at G5, 8 and 10. The Individual Test of Academic Skills (ITAS) provided norm-referenced scores 	
1996-97	<ul style="list-style-type: none"> Fresno USD purchased the TerraNova norm-referenced test series and administered the CTBS/5 assessment package at G1-11 for mathematics, and G3, 6 and 7-11 in Science 	
1997-98	<ul style="list-style-type: none"> Science-Embedded Assessment System (SEAS) implemented district-wide at K-G6 The State of California mandated the use of the Stanford Achievement Test- Series 9 for all California schools receiving public funding 	
1998-99	<ul style="list-style-type: none"> Local standards-based assessment in mathematics and language arts was adopted, developed and piloted by the Fresno USD A system for data analysis and utilization was instituted 	
2000-01	No changes reported	

1998-99	<ul style="list-style-type: none"> The available professional development days from the State of California were eliminated, effectively ending the mandating of 5 days each year to be devoted to mathematics and science After school, weekend, summer and substitute release days were all used to fulfill professional development needs of teachers The USI collaborated with other funded programs (e.g.- the Mentor Program) to expand opportunities for teachers Having established a 100 hour foundation for all but the new teachers, the Year 4 program focused on effectively implementing the chosen standards based curricula, based on the differentiated needs of teachers. Workshops focused on various units of the curriculum Lead teachers work with teachers at participating school sites 	
2000-01	<ul style="list-style-type: none"> No changes reported 	

1996-97	<ul style="list-style-type: none"> Year 1 training for science included a focused look at national benchmarks and curricular implementation at K-G6, and curriculum writing and piloting for integrated courses in G7-12 Minimum of 5 days of professional development for teachers at each participating school mandated The 33 mathematics schools participated in Year 2 training. Mathematics K-6 training focused in more depth on standards, and strategies for working with students The 44 science schools chose a different content area (from life, earth, and physical science) in the same format as mathematics New schools entered into Year 1 training (35 in mathematics and 18 in science). 	
1997-98	<ul style="list-style-type: none"> Professional development to support new high school Algebra-Geometry-Algebra II curricula from Glencoe publications The 20 remaining schools in mathematics and 23 remaining schools in science entered into Year 1 training Year 3 schools in mathematics looked at assessment and demonstrations of student work; in science, a new content area was explored Local presenters facilitated secondary and mathematics and science programs Demonstration summer school focused on mathematics and science Administrator training efforts were re-focused to established site-based leadership

Project Information

USI Project Title : Los Angeles USI
Cohort: 94 (Sept. 95 - Aug. 00)
USI Web Site: www.lausd.k12.ca.us/lausd/offices/lasi

Project Summary

The Los Angeles Unified School District, in partnership with Los Angeles professional, business, scientific, and education communities and through the vehicle of the Los Angeles Systemic Initiative (LA-SI), has reformed the content, delivery, and learning of mathematics, science, and technology in its 722 schools, affecting more than 792,000 students. The LA-SI enables students to achieve the highest standards in mathematics, science, and technology; develop an awareness and an appreciation for these disciplines; and be prepared for higher education, employment, and productive citizenship in a technologically sophisticated 21st century. This dramatic change will become systemic within a 5-year period. The initiative's goals are to improve student learning outcomes in mathematics, science, and technology (MST); to change the scope, sequence, and instructional delivery of MST; to improve management, teacher, and paraprofessional preparation; and to enlist parent and community support. Utilizing the district's newly reconfigured structure, the number of students with access to higher level mathematics and science classes will double and will reflect the ethnic distribution of the district; graduation rates will move to 90 percent; student achievement on performance-based tests of mathematics and science will improve 95 percent; and matriculation rates at college and universities will move to 80 percent. As part of a systemic and sustained effort to significantly improve student achievement in all academic areas, LA-SI is committed to upgrading and reforming both the content and the delivery of mathematics and science education through the implementation of programs designed to meet LA-SI goals. The plan of action to achieve the LA-SI goals proceeds on a variety of fronts and will phase in individual schools over the 5 years.

Project Goals

Creating schools that are centers of learning for everyone. Developing rigorous curricula. Enhancing teacher capacity to teach the new curricula. Recruiting minority teachers from among mathematics and science professionals. Strengthening community partnerships. Raising expectations of achievement for all students. Improving counselor and administrator skills.

Primary Decision Making Body

Standards Curriculum	District
Curriculum/TextBook Adoption	State
Student Assessment	District
Professional Development	District
Resources	District
Teacher Hiring	District
Teacher Contracts	District
Certification & Re-certification	State
Graduation Requirements	District
School-Based Management?	Yes

Policies Promoting Equal Access by All Students in High Quality Education

Student Tracking:	Remedial classes eliminated
Criteria for Entry into High Level Mathematics and Science Courses:	4 years of college preparatory math 3 years of college preparatory science are offered to replace remedial classes
Availability of High Level Courses:	AP Environmental Science and AP Statistics offered

Special Education and Bilingual Students: Sheltered content part of all professional development, and is included in an activity-based, guided inquiry environment of integrated math and science

Field science extended to Special Education

Policies Impacting the Enrollment of Students in Challenging Math and Science Courses

Attendance: School Accountability

Incentives offered

Guidance: Work with school counselors as remedial classes eliminated

Student Support Systems: Bridge program in cooperation with UCLA
Hewlett Packard program in cooperation with UCLA as well

Policies Relevant to Curriculum

Framework:

Curricula:

Materials:

- Mathland
- Quest 2000
- Connected Mathematics
- Interactive Mathematics
- Full Option Science System (FOSS)
- Science and Technology for Children (STC)
- PRIME
- Zubrowsky Science
- Integrated Mathematics (McDougal Lytel)
- SEUP
- Science Plus
- AP Environmental Science
- AP Statistics
- No minimum time: based on adoption and implementation of standards-based, comprehensive curriculum

Standards-based Curriculum and Instruction

Standards Adopted: National Council of Teachers of Mathematics (NCTM)

National Science Education Standards (NSES)

Primary Instructional Strategies:

- Kit-based Science
- Open-ended questions for Math
- Problem solving
- Investigations
- Guided inquiry

Project Summary

The Memphis Urban Systemic Initiative (MUSI) uses mathematics and science education as the vehicle for systemwide school improvement by initiating new policies, programs, and expectations in three areas:

- (1) academic content and graduation requirements, (2) quality teaching, and (3) resource reallocation and development.
- District implementation teams lead large-scale improvement activities in each area, and school-based Mathematics and Science Leadership Teams are assisted by teachers-on-assignment in designing rigorous mathematics and science programs. A comprehensive set of indicators and ambitious yearly benchmarks will allow the district and school to monitor the success of the initiative.

The desired outcomes are consistent with the goals of the Urban Systemic Initiative:

- (1) to improve the scientific and mathematical literacy of all students in urban communities; (2) to provide the mathematics and science fundamentals that will permit all students to participate fully in a technological society; and (3) to enable a significantly greater number of the students to pursue careers in mathematics, science, engineering, and technology.

Project Goals

- To increase the percentage of students who successfully complete algebra I, geometry, algebra II, physical science, biology, and chemistry or physics upon graduation.
- To increase the percentage of teachers using open-ended activities, student projects, performance standards, and student portfolios to assess student progress and inform classroom instruction.
- To increase the number of mathematics and science classes in which problem solving and inquiry are emphasized, that use cooperative learning groups, and in which at least 50 percent of instructional time is devoted to hands-on manipulative activities or nontraditional instruction.
- To increase use of computers, calculators, and other technologies for analyzing data, gathering and organizing information, increasing content knowledge, and demonstrating what has been learned.
- To eliminate disparities in resource distribution across the school district.
- To eliminate disparities in mathematics and science achievement between African American and white students.
- To increase the proportion of African American students in the total number of students enrolling in and passing algebra I and physical science in the eighth grade and physics and calculus in high school.

School-Based Management?	

Policies Promoting Equal Access by All Students in High Quality Education

Student Tracking:	• All low-level math and science courses eliminated
Criteria for Entry into High Level Mathematics and Science Courses:	• G8 students may take physical science and Algebra I for high school credit • Prerequisite courses: Physics requires Algebra II; Calculus requires 4 lower level courses; AP classes require instructors permission.
Availability of High Level Courses:	• All low level mathematics courses (i.e. Applied Mathematics and Arithmetic 9) were eliminated

Special Education and Bilingual Students:

Policies Impacting the Enrollment of Students in Challenging Math and Science Courses

Attendance :

Guidance: • All students before entering high school must complete a four year plan articulating their focused program of study

Student Support Systems: • Students in grades 3-8 who are failing mathematics and science must attend summer school in order to be promoted.

• Saturday Academy
• Science, Technology and Algebra Teams (STAT)

• Algebra and Geometry Camp

• Forensic Science Institute

• Biology Academy

• And other interactive investigations

Others: • Now, 3 summer programs for students using practical applications of math and science.

Policies Relevant to Curriculum

Framework: • Tennessee Curriculum Framework

Curriculum:

Curriculum Materials: • Pacesetter Mathematics (Algebra II, Precalculus); Everyday Mathematics; Connected Mathematics; Mathematics in Context; Full Option Science System (FOSS); Science and Technology for Children; Window on Science; Discover the Wonder; Prentice Hall Geometry; Glencoe Middle School Math, Algebra I, II, Physics; Conceptual Physics; Optical Data; Science Anytime; Scott Foresman Calculus; MacDougal-Little Algebra I; Holt Biology and Chemistry

New Courses Added as a Result of USI:

• Pacesetter Precalculus USI sponsored professional development to certify AP teachers.

Instructional Time: • Instructional Time is determined primarily at the school level, influenced somewhat by state law (minimum standards for overall instructional time)

Standards-based Curriculum and Instruction

Standards Adopted: • Tennessee Curriculum Framework
• NCTM for mathematics

Primary Instructional Strategies: • INRC for science
• Hands-on, inquiry based-instruction kit-based science

• District guidelines: mandate 1 hour a day for math and 1 hour a day for science
% of Students Experiencing Standards-based Mathematics Curricula: E: 100%

M: 100%
H: 100%
% of Students Experiencing Standards-based Science Curricula: E: 100%

M: 100%
H: 100%
E: Elementary School M: Middle School H: High School

Policies Relevant to Teacher Qualifications

Certification: • Non-certified teachers must complete State of Tennessee licensure requirements within three years of initial employment

Requirement & Hiring Practices: • New hires must either be certified or commit to pursue certification within a specified three-year period

Professional Advancement & Leadership Training: • Specific number of professional development or inservice hours must be obtained in order to qualify for re-certification

Contract Requirements: • Teachers must develop and complete a personal professional development plan as part of the district's new teacher evaluation program

Policy Changes to Support Student Success in Math and Science During USI Implementation

School Year	Policy Implemented
Before USI	• Few policies existed to influence achievement in specific content areas
1995-96	• New Graduation Policies: Students are required to have a least three units each of mathematics and science in order to graduate. In mathematics Algebra I must be included; in science, the units must include two laboratory science courses.
	• Students in grades three through eight must pass both mathematics and science in order to be promoted to the next grade
1996-97	
1997-98	• All students must enroll in Algebra I by G9 and Geometry by G10
	• All students must enroll in Physical Science by G9 and Biology by G10
	• Each school must implement a School Improvement Plan that includes the Memphis USI goals and achievements
	• G8 students can receive high school credit for Algebra I and Physical Science
1998-99	• No changes reported
1999-00	• No changes reported
2000-01	• No changes reported

Curriculum and Instruction Changes to Support Student Success in Math and Science During USI Implementation

School Year	Policy Implemented
Before USI	• Curriculum and instruction implementation centered around more traditional practices. Instruction was primarily fact-based and heavily lecture oriented. Little emphasis was place on problem solving, process skills, and critical thinking. In addition,
1995-96	• All low level math courses (e.g., Applied Mathematics and Arithmetic 9) were eliminated
	• Pacesetter Mathematics, a pre-calculus course added to the curriculum
1996-97	• All science classes have adopted standards-based curricular materials selected by individual schools
1997-98	• District Level Mathematics and Science Content Standards developed and implemented
1998-99	• Textbook adoption process for mathematics was completed and all schools selected standards-based mathematics textbooks and curricula
1999-00	• District content standards and curriculum provide framework for instruction
2000-01	• The district adheres to the new state and city framework and curriculum guides that will be implemented in 2001-02

Memphis USI

Professional Development Policy and Program Changes to Support Teachers During USI Implementation		1997-98	Standards-based Assessment System Changes During USI Implementation	
School Year	Policy Implemented		School Year	Policy Implemented
Before USI	<ul style="list-style-type: none"> • Prior to Memphis USI, mathematics and science professional development could be best characterized as extended, sequential training, primarily focused on content as opposed to instructional planning and methodologies. • Professional development was not required 	<ul style="list-style-type: none"> • Memphis City Schools Professional Development Standards developed to direct all professional development activities • Instructional Accountability Initiative (IAI) developed - identifies indicators of classroom instructional practices, provides classroom observations and reports on standards-driven curriculum and instructional practices • Standards-based curricula and introduction implementation strategies are introduced • Teaching and Learning Academy established - a professional development center devoted to math, science and technology 	Before USI	<ul style="list-style-type: none"> • The Tennessee Comprehensive Assessment Program (TCAP) was the assessment program implemented in the district. The TCAP is a legislated mandatory testing program. The pre 1994-95 version was not closely aligned with national and district standards. It d
1995-96	<ul style="list-style-type: none"> • Teachers-on-Assignment (TOA) positions created. TOAs provide assistance in professional development, teacher performance assessment and standards-based curriculum selection and development • Lead teachers for both mathematics and science were trained in each school to promote and advance the implementation of standards-based curriculum, instruction, and assessment 	1998-99	1995-96	<ul style="list-style-type: none"> • No changes reported
1996-97	<ul style="list-style-type: none"> • Professional development requirements for all teachers were increased. All secondary mathematics and science teachers must participate in a two-week summer Equity 2000 Institute. Project Information

USI Project Title : New Orleans USI
Cohort: 94 (Sept. 95 - Aug. 00)
USI Web Site:

Project Summary

The New Orleans Public Schools Urban Systemic Initiative (NO USI) proposes a major and profound change in the entire K-12 science, mathematics, and technology program. Five themes serve as the foundation for the plan of action:

- (1) student achievement/content/instructional delivery/assessment;
- (2) pedagogy/teaching practices;
- (3) school/district culture;
- (4) policy and governance; and
- (5) partnerships/coordination of external agencies and stakeholders.

Project Goals

- ◆ Mathematics, science, and technology education for all students will be spiral, thematic, interdisciplinary, multicultural, and based on national standards and transparently integrated technology.
- ◆ Preservice and inservice activities will promote use of multiple teaching strategies, authentic assessment, and management techniques by all teachers.
- ◆ All schools, departments, and divisions will employ total quality management philosophies, practices, and techniques in creating a culture that supports systemic change.
- ◆ The district will create and realign policies, develop initiatives, reallocate existing funds, and acquire new funds to support the systemic change process.
- ◆ By the end of the first year, consortia of stakeholders will provide expertise, resources, and advice to support the implementation of the initiative.

These themes will generate specific changes that will affect every student, teacher, and staff member in the system.

New Orleans USI

Professional Development Policies and Practices

Evaluation Instruments:

- Surveys
- Rubrics

Community Key Personnel:

Time Required or Supported:
• 2 days state in-service days
• Summer institutes and some Saturdays

Teacher Leaders:
• Lead Teachers

Financial Resources Provided:
• Funds provided for teacher staff development, math & science standards-based curriculum, & teacher certification, technology integration, Internet training in the district through Title I, LEARN LA (Goal 2000), LASIP, USI, Eisenhower, and state

Professional Development Alignment to Content Standards Measures:

Partnerships

Other Key Initiatives:

- Title I
- Curriculum Frameworks
- Eisenhower
- Secondary Funds
- Louisiana Systemic Initiatives
- The Louisiana Collaborative for Excellence in the Preparation of Teachers (LaCEPT)
- Children's Museum
- Greater New Orleans Foundation
- Greater New Orleans Ministerial Alliance
- University of New Orleans
- Delgado University
- Xavier University
- Loyola University
- Texas Instruments
- Johnson O'Malley
- Shell
- McRel Consultants
- FreeNet
- Delta Scientific
- Dow Chemical
- Dupont Chemicals
- North Star Consulting
- Metrovision
- American Chemical Society
- Chambers of Commerce

Alignment to Student Standards:
• Ongoing staff development aligned to standards-based curriculum and student standards

Impact on Student Achievement:
• Evaluation of grades and student scores on standardized tests

Teacher's Instructional Practices Evaluation:

- Standards-based curriculum implemented and Mathematics Science and Technology School Site Coordinators assisting schools with professional development

Policies Relevant to Standards-based Assessments

Extent to Which Assessments are Aligned to District Standards and Curriculums:
• Louisiana Educational Assessment Program Materials (LEAP), and Iowa Test of Basic Skills aligned to the National Council of Teachers of Mathematics standards

Measurement of Impact:
• Data analysis and measurement is available through Data Analyst, UNO Evaluator, and USI Site Coordinators who perform quantitative & qualitative analysis of impact on teacher/students, and IOWA test aligned with curriculum

Higher Education:

- University of New Orleans
- Delgado University
- Xavier University
- Loyola University
- Texas Instruments
- Johnson O'Malley
- Shell
- McRel Consultants
- FreeNet
- Delta Scientific
- Dow Chemical
- Dupont Chemicals
- North Star Consulting
- Metrovision
- American Chemical Society
- Chambers of Commerce

Methods stakeholders are informed of goals, objectives and accomplishments of assessment program:
• District and state test scores are informed of goals, announced publicly

Business and Industry:

Other:
• State master/mentor teacher program
• Outside professional development seminars and training

USI Leadership, Governance, and Management

Type and Amount Received by Average Math/Science Teacher:
• Average 60-120 hours
• Training in implementing mathematics and science standards-based curriculums

Superintendent:

USI Office:
• Interim Superintendent
• 3 Project Directors during tenure of USI: remaining core USI staff remained stable

Other Partnerships:

- American Chemical Society
- Chambers of Commerce

New Orleans USI

Policy Changes to Support Student Success in Math and Science During USI Implementation		Curriculum and Instruction Changes to Support Student Success in Math and Science During USI Implementation		1997-98
School Year	Policy Implemented	School Year	Policy Implemented	
Before USI	•The district initiated a Five-Year Strategic Plan which included plans to ensure quality math and science that "illuminated the need for rigorous academics, professional development, assessment, technology, accountability, and adequate financial and administrative support.	Before USI	•Major teaching method employed was lecture	•The State of Louisiana, after adopting the Louisiana Frameworks for the academic areas in, mandated that local districts develop and implement standards-based curriculum for all students
1995-96	•A district policy of retention in grades K-3 was eliminated		•Very little "hands-on" manipulative activities in mathematics and science classrooms	•NOPS received a LEARN grant for 1997; and through those funds and USI, standards based curriculum guides were developed
1996-97	•State policy was established which directs 12 hours of math and 12 hours of science for elementary certification	1995-96	•No standard delivery of instruction	•Solid science program in place in all elementary schools through the standards based exemplary program FOSS; and in partnership with the University of New Orleans BIOTOOLS is offered
	•Introduction of Louisiana State School Performance Model & Four-Year Action Plan to improve student achievement		•Current research not used in teaching	•Completed standards-based, inquiry-based math and science curriculum guides with an explanation of how to implement the district standards and benchmarks through the use of adopted materials and disseminated the guides to all teachers and schools to use
	•The inclusion of USI benchmarks in all School Improvement Plans, and working in close collaboration and partnership with all district initiatives		•No centralized movement or department for improving the quality of mathematics and science instruction	•Adopted exemplary standards-based curriculum materials/textbooks in math and science which included inquiry-focused activities as well as conceptual knowledge for all math and science students
1997-98	•Algebra I is made available to all 8th graders	1996-97	•Approximately 80% of the high schools did not offer AP courses	•Provided software and Internet resources linked to math and science curriculum frameworks/standards, grade-level benchmarks, and curriculum materials
1998-99			•Remedial courses existed in math	•Completed science curriculum guide for implementing standards and benchmarks with adopted materials.
			•Integration of technology and computers in the classroom very slow	•Adopted new standards-based curriculum, materials, and textbooks in mathematics and science.
			•Formulation of a working definition, curriculum review team and research towards a curriculum plan; exemplary programs plan.	
			•District applied for and received a waiver from the State of Louisiana to implement integrated science courses in G6, 7, and 8	
			•Restructured the mathematics and science curriculum to, correlated with State of Louisiana published frameworks, based on national standards in grade level benchmarks.	
			•Integrated science K-G8 focusing on exemplary mathematics and science curriculum programs	
			•Incorporated standards-based courses at G9-12	
			•Offered special topic electives at G11-12	
			•Correlated curriculum objectives to state assessments	

New Orleans USI

Professional Development Policy and Program Changes to Support Teachers During USI Implementation		
School Year	Policy Implemented	
1998-99	<ul style="list-style-type: none"> • Calculus AP is made available to more high schools • Standards-based curriculum guide completed • Contracted coordinators & external evaluator, University of New Orleans, to perform classroom visits and interviews to assess the degree of math and science curriculum development and implementation, the transformation and/or change in teaching approach • Hired an internal evaluator (data analyst) and external evaluator to provide ongoing formative analysis and evaluation on curriculum development and implementation, student achievement, and teacher professional development • Correlated and integrated appropriate learning technologies with state frame-works/standards, grade-level benchmarks, and district-adopted curriculum programs • Provided software and Internet resources linked to curriculum frameworks/standards, grade-level benchmarks, and curriculum materials; and build staff capacity for integrating technology into thinking/learning process for all students and teachers 	<ul style="list-style-type: none"> • State mandated professional development days were further developed for awareness of the standards-based curriculum, teaching strategies and instruction and initial teacher certification program • USI District Academy Model and Capacity Building established to coordinate all staff development activities toward strategic reform, address school and teacher needs; plan to be focused on needs assessment and established cadres, lead teachers, school-site; -teams; including cabinet, core teams and principals. • Standards-based mathematics and science curriculum training. Awareness and TQM training teachers and administrators in USI Cohort I & II schools received training in mathematics and science content and standards, technology integration and curriculum integration-collaborative project- July 1996-August 1996 • LASIP - Region I Partnership Initiative identified some USI exemplary trained teachers and New Orleans area teachers to serve as master/mentor teachers in collaboration with the LA LEARN for the 21st Century Consortium (Comprehensive Plan To Improve Education)
1995-96	<ul style="list-style-type: none"> • Two composite days added to the school year for planning and staff development • Approximately 1050 teachers and administrators were added as participants in the USI professional development activities. Training consisted of math and science exemplary programs, technology integration, and curriculum integration • Formulation of a professional development model-cadres, lead teachers, principals, and administrative support teams to build capacity at the school sites in curriculum and instructional changes. 	<ul style="list-style-type: none"> • USI started staff development activities for all math, science, technology teachers for the summer 1996 (June-August). Training consisted of math, science and technology Lead Teacher Training, cadre training, Internet and technology integration training, mathematics and science content standards, Pre-K teacher and aides training, etc.
1996-97	<ul style="list-style-type: none"> • The professional development system for math and science teachers was obtained by the teachers themselves or offered through outside seminars and training • Professional development lacked special emphasis in curriculum planning, lesson plans, teacher certification, specialized (subject-matter) instructional strategies, technology education, and school reform issues 	

New Orleans USI

Standards-based Assessment System Changes During USI Implementation

School Year	Policy Implemented	School Year	Policy Implemented
1997-98	<ul style="list-style-type: none"> Required teachers to participate in a minimum of 40 hrs. content-intensive professional development in order to receive the materials for use in their classroom Lead Teachers in each school provide ongoing professional development, site leadership, & support for improving education in math, science, and technology for all teachers 	Before USI	<ul style="list-style-type: none"> State standards-based assessment was consisted of California Achievement Test (CAT) and Louisiana Educational Assessment Program Materials (LEAP)
1998-99	<ul style="list-style-type: none"> Summer of 1998, Lead Teachers became familiar & trained with NCTM Math Standards and NRC Science Standards and participated in Math & Science Professional Development Institutes in math and science content matter through Cadre teachers, university faculty, guest consultants, and industry experts University of New Orleans faculty provided training and assistance to the USI Coordinators in curriculum planning, lesson planning and evaluation, and school improvement plans, teacher individual growth plans, teacher certification, and professional development The USI Project Director and the USI Curriculum Manager were put in charge of standards-based curriculum implementation and training for all subjects in the district Technology training for a team from each school to learn about the use of integrating technology into the classroom activities 	1995-96	<ul style="list-style-type: none"> No changes reported
1998-99		1996-97	<ul style="list-style-type: none"> No changes reported
		1997-98	<ul style="list-style-type: none"> Testing required at the secondary level
		1998-99	<ul style="list-style-type: none"> Criterion reference test's will be administered at G 4 and 8, rather than G 3, 5, 7 Norm referenced test's will be administered at G 3, 5, 7, rather than 4, 6, & 8

Project Summary

The Philadelphia Urban Systemic Initiative (PHUSI) seeks to develop and build upon K-12 networks within the School District's 22 K-12 feeder-pattern clusters. These networks consist of communities of students, teachers, principals, other staff, and parents from every school site within these 22 clusters. The PHUSI links these vertical networks within each cluster with cross-cluster (city-wide) networks that include science and mathematics teacher-leaders, technology liaisons, and principals. Through professional development and technical assistance in conjunction with the School District Teaching and Learning Network, PHUSI helps every site develop and implement a School Improvement Plan focused on standards-driven learning goals in science and mathematics for all students and ensures alignment of curriculum, instruction, assessment, resources, professional development, parent involvement, and community partnerships with these quality learning goals. PHUSI coordinates with other School District offices to develop both human and electronic networks as well as databanks of effective SMT programs, professional development resources, and performance assessment items. PHUSI seeks to connect every school/cluster with SMT community partners that include universities, businesses/industries, professional organizations, museums, and government agencies.

Project Goals

- To implement a standards-based, K-12 science, mathematics, and technology curriculum.
- To enact a systemic professional development program incorporating extant NSF-funded programs and site-based professional development.
- To begin performance-based student assessment to complement traditional assessments.
- To produce an extensive student support services network developed in conjunction with the School District Offices and various community partners.
- To develop parent and community partnerships to support science, mathematics, and technology education.

% Schools:		67%	95%	100%	100%

*Core Data Elements 2000-2001; ** K-1 2001

Italics: Data Imputed

Primary Decision Making Body

Standards Curriculum	District
Curriculum/TextBook Adoption	District
Student Assessment	District
Professional Development	District
Resources	District
Teacher Hiring	District
Teacher Contracts	District
Certification & Re-certification	State
Graduation Requirements	State
School-Based Management?	Yes

Policies Promoting Equal Access by All Students in High Quality Education

Student Tracking:	• No general mathematics or science courses offered at high school level
Criteria for Entry into High Level Mathematics and Science Courses:	• Full inclusion model
Availability of High Level Courses:	• Physical Setting Level I (Introduction to Earth/Space Science, Chemistry, Physics) is the G9 science course
	• Algebra I or Integrated Mathematics I are the G9 mathematics courses

Special Education and Bilingual Students: • The Office of Language Equity Issues was established to address the needs of ESOL/Bilingual Students

Policies Impacting the Enrollment of Students in Challenging Math and Science Courses

Attendance :
Guidance:
Student Support Systems: • After school programs and summer school designed by clusters and schools

Policies Relevant to Curriculum

Framework: • Philadelphia Curriculum Frameworks, 3rd Edition
Curriculum:
Curriculum Materials: • None reported
New Courses Added as a Result of USI: • None reported

Instructional Time: • Graduation requirements: 4 credits math and science by 6/2002

Standards-based Curriculum and Instruction

Standards Adopted: • For content, NCTM benchmarks for science literacy, Pennsylvania State Academic Standards
Primary Instructional Strategies: • Hands-on, inquiry oriented instruction
% of Students Experiencing Standards-based Mathematics Curricula: E: 100%
M: 100%
H: 100%

% of Students Experiencing Standards-based Science Curricula:

E: 100%
M: 100%
H: 100%

Policies Relevant to Teacher Qualifications

Certification: • State mandated content and pedagogy requirements

Requirement & Hiring Practices

Professional Advancement & Leadership Training: • Intern teachers are mentored by experienced teachers
Contract Requirements:

Professional Development Policies and Practices

Time Required or Supported: • 40 hours per year: 20 hours after school or on Saturdays and 4 days during the school year

Financial Resources Provided: • Annenberg Children Achieving Challenge Grant
• Eisenhower Funds

• Title I
• Perkins Fund
• Funds raised by partners such as the Philadelphia Education Fund
Alignment to Student Standards: • All professional development must be focused in three priority areas, 1) literacy, mathematics and science, 2) best practices for school improvement, 3) equity and high performance

E: Elementary School M: Middle School H: High School

Policy Changes to Support Student Success in Math and Science During USI Implementation		Curriculum and Instruction Changes to Support Student Success in Math and Science During USI Implementation	
School Year	Policy Implemented	School Year	Policy Implemented
Before USI	<ul style="list-style-type: none"> • Science and Mathematics instruction was supported through funding within the School District Partner organizations (PATHS/PRISM), The Franklin Institute, and Universities offered additional resources • Classroom supervision was provided by Central Office science and mathematics supervisors and department heads/chairs in the high schools 	Before USI	<ul style="list-style-type: none"> • State frameworks to address state learning outcomes were not available • The School District was in the process of developing content standards and curriculum frameworks aligned with national standards • Many teachers reported inadequate resources, particularly in terms of mathematics and science
1995-96	<ul style="list-style-type: none"> • Implementation of a new form of district organization, the K-12 feeder pattern cluster 	1995-96	<ul style="list-style-type: none"> • Development of content standards, aligned with national standards in English/Language Arts, Mathematics, Science
1996-97	<ul style="list-style-type: none"> • Implementation of a professional responsibility system that hold administrators and teachers accountable for the achievement of students 		<ul style="list-style-type: none"> • Many participants in the learning process express the belief that all students can learn, yet tracking at various levels provided evidence to the contrary
1997-98	<ul style="list-style-type: none"> • Leadership in Education Apprentice Design (LEAD) program instituted to prepare new administrators for the position of school principal 		<ul style="list-style-type: none"> • The School District of Philadelphia took the first steps to raise student achievement levels by adopting rigorous content standards designed to prepare all students to succeed in higher education and/or the workplace. Science was included one year earl
1998-99	<ul style="list-style-type: none"> • Graduation and Promotion Requirements were adopted: 4 years of mathematics and science, success in city-wide midterm and finals, complete interdisciplinary and service learning projects, and a score of at least Basic on the SAT-9 science and mathematics 		<ul style="list-style-type: none"> • Creation of a Teaching Learning Network to support and be a resource for curriculum, instruction, and assessment strategies in the first 6 Clusters
1999-00	<ul style="list-style-type: none"> • No changes reported 		
2000-01	<ul style="list-style-type: none"> • Graduation and promotion supports and requirements implemented 		

• Implemented a professional responsibility system based on the establishment of one set of rigorous standards for all students. The Performance Index is designed to provide an overall measure of progress in each school and set performance targets

• Science and mathematics Curriculum Frameworks were adopted

• Database of best practices including research-based successful teaching practices and curriculum programs was adopted

• No changes reported

• Course alignment process identified need for new and additional upper level math and science courses

• Curriculum frameworks implemented

About USI and KIDS

In 1994, NSF launched the Urban Systemic Initiative (USI) program, applying lessons learned from its initial State Systemic Initiative (SSI) program to the problems of inner-city school systems. The USI program was offered to major cities with the largest number of K-12 students living in poverty. Five cohorts of cities signed cooperative agreements with NSF for a five-year concerted system-wide effort to promote standards-based reform in mathematics, science, and technology (MST). The NSF investment was meant to be a catalyst for large-scale educational change affecting standards, curriculum, assessment, professional development, partnerships, and convergence of intellectual and fiscal resources, with constant attention to improving student achievement. NSF's focus on results has become even stronger following passage of the Government Performance and Results Act (GPRA). Over the course of its systemic initiative programs, NSF has developed a theoretical structure for systemic reform that is based on six "drivers" including four process drivers and two student outcome drivers, as well as a number of cross-cutting issues such as equity, quality, scaling up, coordination and organization.

Systemic Research, Inc. received a three year grant to explore the impact of the NSF's USI program on student achievement and the learning infrastructure in urban school districts by examining relationships among the process drivers (factor, or independent variables) and outcome drivers (system output, or dependent variables). The intent was to establish an inferential causal structure that allows reasonable attribution of impacts to program elements. Results of the study allow broader dissemination of successful systemic initiative models based on a "reverse engineering" approach.

As a vital instrument for systemic analysis, our evaluative study team developed a Key Indicator Data System (KIDS) to collect comprehensive annual core data using both quantitative (K-1: focused on demographics, student outcomes, and teacher preparations) and qualitative (K-2: focused on policies relevant to six drivers) templates. KIDS was tailored to each cohort/site due to the differences in USI timelines, curriculum structure, and student assessment systems.

With the cooperation from 22 USI sites (PIs/PDs, data managers, and local evaluators), as well as collaboration from the Educational Testing Service, The College Board, and ACT, Inc., our study team completed KIDS data collection. The qualitative data was also compiled/extracted from the individual Annual Reports and PER documents collected from all 22 sites during the project period.

The three-volume Urban School Key Indicators of Science and Mathematics Education: 2001 presents the essence of each USI's progress based on KIDS-1999, 2000, and 2001 from each site's baseline year to SY 1999-00. This report replaces Urban School Key Indicators of Science and Mathematics Education: Based on Key Indicator Data System (KIDS-1999), Volumes I-IV.

Please refer to our evaluative study web site <http://www.systemic.com/usi> or the Systemic Initiative (SI) study group web site <http://www.sistudyforum.org> for details of study progress and available electronic version of various study reports.

Project Summary

The Milwaukee Urban Systemic Initiative (MUSI) is a 5-year cooperative agreement between the National Science Foundation and the Milwaukee Public Schools (MPS) to bring about significant improvements in the science and mathematics achievement of all children in the public schools. Built on the model of a community of learners, MUSI will foster a culture of inquiry-based learning in every classroom and school throughout the school district and the greater Milwaukee area. In this model, opportunities to learn are not limited by classroom walls. The diverse resources of the urban center are available to promote learning and achievement for all students. Students, teachers, parents, and other community stakeholders share responsibility for their own learning and for facilitating the growth of learning throughout the community. In the school community, teachers, parents, students, and others join together in advancing the knowledge, expertise, and experiences of their colleagues and work collaboratively to refine their expectations, expand their resources, develop learning experiences, and gather data on achievement to inform their instructional planning. MUSI has three components that will promote the development of these communities of learners.

- (1) The first is a cadre of Mathematics/Science Resource Teachers (MSRTs) who will serve as catalyst for change in two school communities. The MSRTs work with teachers, parents, principals, and students in developing a learning community committed to content-rich standards-based science and mathematics. This includes participating in school planning, providing access to resources and opportunities, organizing networks of teachers, facilitating staff development, mentoring teachers in classrooms, and arranging school partnerships with communities and business.
- (2) The second component is the establishment of a place that will serve as a hub of mathematics and science education and as an icon of excellence and equity. The COSMIC Center (Catalyst Optimizing Science and Mathematics in the Community) will provide a wide array of activities designed to advance the mathematics and science knowledge and expertise of staff, parents, and other community stakeholders. Through a growing array of courses, workshops, seminars, and forums, the COSMIC Center will bring together members of the various learning communities around topics of interest and critical issues related to mathematics, science, and technology.
- (3) The third component is the creation of a Clearinghouse of Opportunities, an electronic and print facility that will provide timely information about, and access to, the many opportunities for learning mathematics and science available to students, parents, teachers, and other staff. This network will serve also to highlight effective programs and projects and assist others to adopt or adapt their ideas for their own use.

Project Goals

- Establish Ongoing Collaborative Vision Setting
- Instituting High Standards and Performance Assessments
- Addressing Ethnic, Gender, and Socioeconomic Achievement Gaps
- Developing High Content, Inquiry-based, Technology-Rich Curriculum and Instruction
- Breaking the Boundaries Between Classroom and Community

Professional Development	School
Resources	School
Teacher Hiring	District
Teacher Contracts	District
Certification & Re-certification	State
Graduation Requirements	District
School-Based Management?	

Policies Promoting Equal Access by All Students in High Quality Education

Student Tracking:	• Lower level science courses (e.g. Applied Science) have been eliminated
Criteria for Entry into High Level Mathematics and Science Courses:	• All G8 students take algebra • Students must meet middle level proficiencies

Availability of High Level Courses:
• All students must take chemistry or physics
• Senior level courses: environmental science, physics, genetics & biotechnology

Special Education and Bilingual Students:
• Regular mathematics and science curriculum serves as basis for Individual Education Plans
• Most special education students are mainstreamed and are taking the middle school mathematics proficiency assessments

Policies Impacting the Enrollment of Students in Challenging Math and Science Courses

Attendance:
Guidance:
Student Support Systems:
• Pre-college programs at local universities
• Saturday Academies
• School-based Mentors
• Tutoring in school and community
• Tuition for advanced university courses
• Expanded summer school with emphasis on mathematics and science
• Safe Place Community Learning Centers

Policies Relevant to Curriculum

Framework:
Curricula:
Curricula Materials:
• Investigations in Numbers, Data and Space
• Connected Mathematics
• Explorations in Science
• Science Plus
New Courses Added as a Result of USI:

Instructional Time:

- Block Scheduling
- Some middle schools have long classes in
- Extended school year

Standards-based Curriculum and Instruction

Standards Adopted:

- National Council of Teachers of Mathematics (NCTM)
- Wisconsin Academic Standards
- National Research Council (NRC)
- American Association for the Advancement of Science (AAAS)

Primary Instructional Strategies:

- Inquiry learning: students solve problems, pose and answer sophisticated questions and engage in complex, real life projects

% of Students Experiencing Standards-based Mathematics Curriculums:

- E: 30%
- M: 95%
- H: 15-20%

% of Students Experiencing Standards-based Science Curriculums:

- E: 80%
- M: 50%
- H: 5-10%

Policies Relevant to Teacher Qualifications

Certification:
Requirement & Hiring Practices
• Saturday recruitment in spring of year scheduled
Professional Advancement & Leadership Training:
• 3 years of USI-University of Wisconsin Madison courses on mathematics curriculum and leadership training for "teacher leaders"
Contract Requirements:
• K-G8 Mathematics/Science Resource Teachers

E: Elementary School M: Middle School H: High School

Urban Systemic Initiatives (USI)

Project Summary

Systemic change in San Antonio requires dismantling old practices, including a tradition of isolation, to build a collaborative process that takes advantage of the combined resources, talents, and leadership of our many school districts. The title of the initiative is MAS y MEJOR, the Spanish acronym for "Mathematics And Science: Multiplying Excellence by Joining Our Resources." In Spanish, MAS y MEJOR mean "More and Better." MAS y MEJOR is built on the strength of having more districts involved in designing a better plan for improvement in mathematics and science education in which (1) more students learn and achieve in better mathematics and science courses of consistently high-quality in all nine school districts. (2) more teachers learn and use better teaching strategies. (3) more content and better teaching approaches are modeled by university and college professors and instructors in mathematics and science programs for teachers. (4) more cooperation takes place across school policies and practices are established that impact every student in every school. (5) more schools address mathematics and science learning and teaching in their Campus Improvement Plans, and better programs are available to support students who are having difficulty in learning mathematics and science. (6) more calculators and computers are used with better software and integration into the regular instructional program.

Project Goals

- ◆ Implement up-to-date, rigorous science and mathematics content and assessment and strong student support programs.
- ◆ Provide high-quality offerings and a structure for ongoing professional development for all teachers of mathematics and science.
- ◆ Design and carry out Campus Improvement Plans that include meaningful, long-term mathematics and science objectives and strategies.
- ◆ Align policies, resources, and administrative practices that will establish and maintain high expectations and equal opportunities in mathematics and science for all students.

abersin@mail.sandi.net

Project Summary

The San Diego Urban Systemic Initiative (SD-USI) is designed to be systemic in nature, rather than an additional "project" layer that remains separate from the overall operation of the district. The initiative is aligned with the district vision and mission, and incorporates an implementation strategy utilizing the district's organizational structure and accountability measures for the achievement of the USI goals. USI's design supports and supplements other major initiatives, including the National Alliance for Restructuring, New Standards Project, the Edna McDonnell Clark Foundation, and the Program for Student Achievement. The district will utilize assorted program funds together with USI funds, which will connect separately funded programs and ensure an integrated implementation strategy across the district and in the schools.

Project Goals

- ◆ **Systemic Support**
Graduation requirements will be increased, schools will be held accountable for ambitious outcomes, and resources will be allocated to support improvement. Leadership and organization of instructional programs will be strengthened.
- ◆ **School Site Capacity and Community Involvement**
Schools will address both mathematics and science in their comprehensive site plans, key teachers will be put in place, and supportive family and community participation will be sought.
- ◆ **Learning Environment and Student Opportunities**
Rigorous content and performance standards will be implemented, and students will have access to academic support. Student achievement will increase and all students will meet the challenge of the district's standards in mathematics and science.
- ◆ **School Staff Quality**
Teachers will have ongoing opportunities for professional development in mathematics and science at their school site, at summer camps, at district centers, and at area colleges and universities.

Urban Systemic Initiatives (USI)

Project Summary

The St. Louis Urban Systemic Initiative (SLUSI), a five-year, large-scale comprehensive strategy to transform current thought and educational practice to bring all of the District's students to educational excellence in mathematics, science, and technology (MST), is composed of four major interventions to improve student achievement:

- (1) Curriculum/instruction and assessment, which incorporate cutting-edge MST content with exemplary instructional and assessment strategies that prepare students for effective functioning in the 21st century;
- (2) Professional development of a massive order, which improves student learning by preparing staff as MST content masters who engage in authentic assessment as reflective practitioners while modeling high expectations for all students;
- (3) Student support systems, which serve as learner safety nets to assure student mastery of critical MST elements in a timely fashion; and
- (4) Structural, organizational process reforms of policies and practices, which encourage student persistence and support student achievement and professional development.

With assistance from the St. Louis Collaborative, the Mayor, and the larger community, the District will use the NSF grant to leverage larger support for the ambitious vision of its future, engaging prominent representatives of institutions of high education, business and industry, K-16 educators, labor unions, parents, government agencies, and other community stakeholders.

Italics: Data Imputed

Primary Decision Making Body

Standards Curriculum	District
Curriculum/TextBook Adoption	District
Student Assessment	District
Professional Development	District
Resources	District
Teacher Hiring	District
Teacher Contracts	District
Certification & Re-certification	State
Graduation Requirements	District
School-Based Management?	Yes

Policies Promoting Equal Access by All Students in High Quality Education

Student Tracking:	None
Criteria for Entry into High Level Mathematics and Science Courses:	Algebra and biology specified as core curriculum courses for all G9 students A unitary program of studies adapted for all students
Availability of High Level Courses:	All students have access to high-level courses

Special Education and Bilingual Students: A policy of inclusion, mainstreaming, and class- within-a-class models have been implemented to accommodate these students needs

Policies Impacting the Enrollment of Students in Challenging Math and Science Courses

Attendance : Promotion and attendance policies designed to support students' persistence to graduation

Guidance: Planned activities designed to promote science, mathematics and technology learning and career development

Student Support Systems:

Policies Relevant to Curriculum

Framework:

Curricula:

Curricula Materials: Investigations
Full Option Science (FOSS)

New Courses Added as a Result of USI:

Instructional Time: K-G5: 150 minutes per week in mathematics and science, with at least 1 40-60 minute laboratory

G6-8: extended mathematics and science laboratory classes

G9-12: laboratory class at least 2 times per week

Standards-based Curriculum and Instruction

Standards Adopted: National Council of Teacher of Mathematics (NCTM)

National Science Education (NSE)

Primary Instructional Strategies: Inquiry-based class activity
E: Direct instruction combined with constructionist approaches

M: Direct instruction combined with inquiry-based and performance-based instruction

H: Mathematical modeling: inquiry/performance based learning following direct instruction

% of Students Experiencing Standards-based Mathematics Curriculums:

E: 65%
M: 65%

H: 75%

% of Students Experiencing Standards-based Science Curriculums:

E: 65%
M: 65%

H: 75%

E: Elementary School M: Middle School H: High School

St. Louis USI

Policies Relevant to Teacher Qualifications

- Certification:**
- Recruitment strategies have been broadened to allow for alternative certifications for critical areas of instruction
- Requirement & Hiring Practices**
- Aggressive recruitment and retention efforts continue, but there remains a critical shortage of teachers in mathematics and science
- Professional Advancement & Leadership Training:**
- Policies are designed to attempt to foster and sustain a stable, qualified workforce
- Contract Requirements:**

• Science teachers involved in monthly meetings

• Biology group meets with Washington University Biology/Botanical Garden Outreach program to design lab sessions and create diagnostic quizzes

• Workshop evaluation forms plus additional follow-up activities on site

• Portfolios and student work

• Diagnostic quizzes (high school)

Evaluation Instruments:

Professional Development Alignment to Content Standards Measures:

Teacher's Instructional Practices Evaluation:

• Observation checklists for examining inquiry-based strategies employed in classrooms

Professional Development Policies and Practices

- Time Required or Supported:**
- School-based models ensure full-participation in after school and Saturday activities
- Financial Resources Provided:**
- Focus on alignment of curriculum, instruction, and assessment goals
- Alignment to Student Standards:**
- Several workshops in Investigations (math) and Full Option Science (FOSS) kits
 - One semester for selected middle school algebra teachers of a Saturday morning course taught by Math Curriculum Supervisor
- Measurement of Impact:**

Policies Relevant to Standards-based Assessments

Extent to Which Assessments are Aligned to District Standards and Curriculums:

- Alternative assessments have been mandated in order to broaden the scope of data available to gauge curriculum effectiveness and student learning

- Curriculum standards aligned with state standards as assessed by Missouri Achievement Program - the District's high stakes test

Methods stakeholders are informed of goals, objectives and accomplishments of assessment program:

- Individual student five-week diagnostic quiz results by curriculum objective (high school)
- Test profiles
- Student grades
- Parent-Teacher conferences
- District's Annual Report to the Community
- Media publication of MAP results

USI Leadership, Governance, and Management

Superintendent:

- NSF required District to appoint a Senior Advisor for student achievement and accountability in January 1999

USI Office:

- Project Director and Divisional Assistants for Administration and Fiscal Control

Community Key Personnel:

- Liaisons with universities, Science Center, Botanical Garden, and Zoological Park

Teacher Leaders:

- Teacher Mentors

St. Louis USI

Partnerships

Other Key Initiatives:

- Danforth Foundation
- Roblee Foundation
- MidWest Regional Education Consortium

- Cooperating School District
- School Partnership Program
- Parents

Community Stakeholders:

Higher Education:

- Washington University
- Saint Louis University
- Maryville University
- Harris-Stowe State College
- University of Missouri - Saint Louis
- Saint Louis Community College
- Fontbonne College

Business and Industry:

- General American Insurance Inc.
- Health Link, Inc.

Other Partnerships:

- Saint Louis Science Center
- Missouri Botanical Garden
- Zoological Park

Policy Changes to Support Student Success in Math and Science During USI Implementation

School Year	Policy Implemented
Before USI	<ul style="list-style-type: none"> • Board policy has consistently supported challenging standards • Mathematics and science requirements for graduation had traditionally exceeded State minimum standards requirements by a year
1996-97	• No changes reported
1997-98	• Increased high school graduation requirements in math and science creating a four-year continuum
1998-99	• No changes reported

Curriculum and Instruction Changes to Support Student Success in Math and Science During USI Implementation

School Year	Policy Implemented
Before USI	<ul style="list-style-type: none"> • The status of the mathematics curriculum and instruction had been influenced by the development and introduction of National Standards even before the implementation of USI • Prior to the implementation of USI, improvements in the science curriculum were stalled due to the national debate concerning the aims of science curriculum. The result was differentiated courses at ninth grade and a lack of a uniform, focused delivery
1996-97	• No changes reported
1997-98	• Engagement in inquiry-based class activity supported by extended instructional time and laboratory periods
1998-99	• No changes reported

St. Louis USI

Standards-based Assessment System Changes During USI Implementation

Professional Development Policy and Program Changes to Support Teachers During USI Implementation

School Year	Policy Implemented	School Year	Policy Implemented
Before USI	<ul style="list-style-type: none"> •Eisenhower Professional Development Program funds provided resources for Math and Science teachers •A broad range of activities was designed to enhance content knowledge and instructional approaches was aimed primarily at elementary and middle school teachers •Although generally aligned with District goals of improving teacher performance, the effort was not integrated with other District initiatives •Professional development was not mandatory 	Before USI	<ul style="list-style-type: none"> •Prior to USI the District used the statewide Missouri Mastery Achievement Test (MMAT), a criterion-referenced test for selected grades and the local employment of the SAT-8, administered K-12
1996-97		1996-97	<ul style="list-style-type: none"> •Missouri Assessment Program (MAP), standards-based for mathematics
1997-98		1997-98	<ul style="list-style-type: none"> •Adopted a revised, comprehensive assessment plan which included constructivist models, periodic interim content assessments, performance assessments, portfolio assessments, and student projects •Missouri Assessment Program (MAP), mathematics science, communication arts •Stanford Achievement Test (SAT-9)
1998-99	<ul style="list-style-type: none"> •No changes reported •Programs and resources targeting science and mathematics teaching (SMT) are collapsed under the USI protocol to promote a more focused targeted delivery system •USI Professional Development Program (incorporating Title I, and Title II) •District-wide and school-based programs emanate from a unitary focus on the delivery of standards-based curriculum and assessment •USI Professional Development centered around curriculum implementation: K-G5: Investigations (math), inquiry/performance based, G6-8: connected math pilots, G9-12: computer enhanced learning, curriculum articulation and coordination 	1998-99	<ul style="list-style-type: none"> •Interim content-specific quizzes linked to curriculum standards and curriculum instruction pacing

Project Summary

The Atlanta Systemic Initiative (ASI) will serve all K-12 students enrolled in Atlanta Public Schools (APS). ASI will provide 100 hours of professional development (PD) to 1,600 elementary school, 200 middle school and 150 high school teachers and 50 special needs teachers designed to alter their pedagogical approach, as well as 350 administrators, instructional specialists, counselors, registrars and paraprofessionals. APS parents, community members, the Atlanta Business and higher education communities will also participate in ASI.

All instructional personnel will be trained in the use of technology as a tool which provides instructional support and access for all students. Further, they will be trained in the development and use of alternative assessments designed to measure student achievement. Emphasis in the ASI classrooms will be on inquiry and problem solving. A Math and Science Model Teacher Leaders will be trained to assure that ASI practices are adopted and used in each APS math/science classroom

Students will be engaged in experiments, simulations and modeling activities, as well as utilizing technology to access and retrieve data, and communicate. A multifaceted approach to learning will be employed. Students will be afforded experimental, collaborative, cooperative, small group, and informal educational opportunities. Parents, business persons, college and university students, and others will augment the APS students' educational opportunities in science and mathematics. All APS students will complete 4 years of mathematics and 4 years of science to earn a high school diploma.

Project Goals

To provide all Atlanta Public School students with the fundamentals of mathematics and science, so that their understanding, ability, and academic achievement enables them to perform at or above their peers from around the United States, while experiencing success in the Twenty-First Century, i.e. mathematical and scientific literacy sufficient for citizenship and competency sufficient for life and work in a technological age.

Teacher Hiring	District
Teacher Contracts	District
Certification & Re-certification	State
Graduation Requirements	State
School-Based Management?	Yes

Policies Promoting Equal Access by All Students in High Quality Education

Student Tracking:	*Tracking prohibited
Criteria for Entry into High Level Mathematics and Science Courses:	*Prerequisites must be completed successfully

Availability of High Level Courses:

*Each school is expected to have at least one advanced level course offering. The availability of courses depends on each school's master schedule and student population

Special Education and Bilingual Students:
*These students receive individualized curriculum and instruction. There is an extended year program for students with disabilities (2000-01).

Others:

*Eighth graders who take Algebra I and Euclidean Geometry and successfully complete these courses with a grade of "C" or higher can earn Carnegie units that are applicable towards *Promotion at the elementary school includes mastery of the school system's content and performance standards in mathematics and language arts

*Promotion to the next grade at middle school depends on the student passing four courses that include mathematics and language arts

*Homework Hotline sponsored by teachers

Policies Impacting the Enrollment of Students in Challenging Math and Science Courses

Attendance: *Descriptor code OCGA: Students are expected to be present at school and to arrive and depart on time in accordance with the provisions of the Georgia Compulsory Attendance Law

Guidance: Student Support Systems:

*Non-graded/Transitional program; Extended School year for Students with Disabilities, Pre-Kindergarten Program, Elementary and Middle School Xandru Program, Elementary Literacy Village, Middle School Literacy Algebra Academy, Middle School Algebra Camp, Middle and High Schools Transition Programs, High School Academy, High School Mathematics and Science Enrichment Academy, Parenting Workshop and Students performing in lowest quartile on standardized tests in math in benchmark grades (3,8) get targeted instruction assistance.

Policies Relevant to Curriculum

Framework: *State framework
Curricula: *Georgia Quality Core Curriculum (QCC)

Materials:

New Courses Added as a Result of USI:
*Environmental Science (Reg. & AP); Increase
*Contextual Physics and Principles of Technology

Standards-based Curriculum and Instruction

Standards Adopted: *Share standard with Georgia QCC; Enhanced QCC Standard for Algebra I and Pre-Algebra

Primary Instructional Strategies:
*E: science emphasizes Kit-based Essential Labs for K-8 mathematics in progress
*E: Manipulative materials

*E, M, H: Experimentation

*M: Manipulative materials in mathematics and technology

% of Students Experiencing Standards-based Mathematics Curriculums:

E: 100%

M: 100%

H: 100%

% of Students Experiencing Standards-based Science Curriculums:

E: 100%

M: 100%

H: 100%

Policies Relevant to Teacher Qualifications

Certification: *Teachers must earn 10 SDU or the equivalent in college course and take and pass away required tests for re-certification. +

Requirement & Hiring Practices
*Teacher profile used in recruitment

E: Elementary School M: Middle School H: High School

Atlanta USI

Professional Advancement & Leadership Training:

- Must obtain certification within 1-2 years of hiring.

Professional Development Policies and Practices

- Time Required or Supported: Minimum of 20 clock hours each calendar year. 50 hours for recertification

Financial Resources Provided:

- Alignment to Student Standards: Aligned to national, state, and local standards and assessment
- Measurement of Impact: Sustained follow-up for each course
- Baseline data gathered
- Model Teacher Leaders assist with follow-up and delivery of on site staff development

- Type and Amount Received by Average Math/Science Teacher: Elementary Science Education Partners training on kits in science
- Training for SKIL teachers for each school
- Two days per kit, three kits per grade level
- Training for Model Teacher Leaders: content pedagogy, leadership, change and communications (100 hours)
- Standards-based math courses aligned to the curriculum
- 30 -100 hour workshops or courses (3-10 ten-hour staff development units)

Evaluation Instruments:

- Professional Development Alignment to Content Standards Measures:

- Teacher's Instructional Practices Evaluation:

- Impact on Student Achievement:

Workshop assessment instruments

- All professional development courses are aligned to standards

- Observations by principals and assistant principals
- At high school level department heads observe
- Analysis of test data provides content focus for professional development as well as assess instructional practices.

USI Office:

Community Key Personnel:

Policies Relevant to Standards-based Assessments

- Extent to Which Assessments are Aligned to District Standards and Curriculums:

- SAT-9 is 85% aligned

- CRC Tests are 100% aligned

- Georgia High School Graduation Tests are 100% aligned; Algebra I Cluster Tests 100% aligned; Third Grade Achievement Test 100% aligned

- Methods stakeholders are informed of goals, objectives and accomplishments of assessment program:
- Student achievement goals communicated to students through their school staff
- Report cards
- Letters
- Workshops
- News media
- School Board meetings
- Individual test reports
- Parent Reports
- Permanent record folders
- PTA Meetings

USI Leadership, Governance, and Management

Professional Development Policy and Program Changes to Support Teachers During USI Implementation

School Year	Policy Implemented
Before USI	<ul style="list-style-type: none"> • All teachers must engage in 20 hours of professional development that included 5 hours of technology training • 1-3 hours staff development courses provided by classroom teachers, college professors and educators from other districts • Instructors designed courses based on school or system request • Primary incentive for teachers to take the courses included stipends or the need for re-certification • Courses not aligned to state or local curriculum • Courses not aligned to state or local curriculum
1998-99	<ul style="list-style-type: none"> • Professional development must be in areas of reading (K-G3), mathematics, science and technology • Increase in content-based professional development courses for mathematics and science teachers

Standards-based Assessment System Changes During USI Implementation

School Year	Policy Implemented
Before USI	<ul style="list-style-type: none"> • Review of structure, content, and extent of alignment to standards of existing math and science workshops. Result of review was the development of syllabi for professional development courses that were aligned to the curriculum, identification of targets • Request for Assistance was sent to universities to design standards-based staff development courses. It was required that each course have an instructor's manual and syllabus. The courses were delivered this summer and during the academic year • Model Teacher Leaders have been trained to help facilitate the instruction of courses offered by the universities • The USI staff, including the math and science coordinators received staff development • The USI business partners (Atlanta Partners for Education, IBM, and Atlanta Chamber of Commerce) sponsored a half-day workshop of managing change; and principals received a two-day workshop on their roles in leading systemic reform • Parent workshops were offered in six schools at tenth Annual Parenting Conference
1998-99	<ul style="list-style-type: none"> • Student performance has been assessed through State and system wide tests. State and system wide tests include: <ul style="list-style-type: none"> * Georgia High School Graduation Tests in Mathematics and Science * Preliminary Scholastic Assessment Test (PSAT) for G11 * Scholastic Assessment Test (SAT) for seniors * Algebra Tests * Iowa Test of Basic Skills in Mathematics (G1-8) and Science (G33,5,8) * Tests of Achievement and Proficiency in Mathematics (G9,10) • All state required tests are aligned to the state Quality Core Curriculum
1999-00	<ul style="list-style-type: none"> • No changes reported
2000-01	<ul style="list-style-type: none"> • SAT-9 • 3rd Grade Achievement tests • Advanced placement tests; Standards-Based Elementary Science Kits Pre and Post Tests; CRCT for all grades 1-8

Project Summary

The Jacksonville Urban Systemic Initiative (JUSI) serves one large school district with 163 schools, over 7,000 teachers, and approximately 127,404 students. There are four post-secondary institutions in the district that work closely with the JUSI in providing professional development for teachers. The JUSI provides professional development services via a team of resource teachers and individual lead teachers based in schools. These individuals work with classroom teachers on individual and group bases through workshops and direct classroom assistance. Schools have been incorporated into the initiative in cohorts, with a new cohort entering the program each year. Since its inception, the JUSI has served the majority of teachers in the district yielding a notable increase in the number and percent of teachers who received 60 or more hours of professional development during a single year. The effort has translated into pronounced enrollment increases in mathematics, science, and technology courses by students from almost all ethnicity gender groups. The initiative has sparked an increased enrollment, improved course completion rates, and improved performance on measures of achievement. The JUSI has driven policy changes that pave the way for enhanced mathematics, science, and technology education. The JUSI has actively pursued the convergence of resources, particularly among business and community leaders, to establish a support base for continuing the initiative for years to come.

Project Goals

To provide support services to teachers to improve the quality of science and mathematics instruction including standards-based curricula, research-validated instructional materials, professional development, and monitoring of student achievement.

To increase the mathematics and science achievement of all students and to reduce the achievement gap between majority and minority student populations.

Primary Decision Making Body

Standards Curriculum State
 Curriculum/TextBook Adoption District
 Student Assessment School
 Professional Development School
 Resources State
 Teacher Hiring District
 Teacher Contracts District
 Certification & Re-certification State
 Graduation Requirements State
 School-Based Management? Yes

Policies Promoting Equal Access by All Students in High Quality Education

Student Tracking: None
 Criteria for Entry into High Level Mathematics and Science Courses: Completion of Algebra I, Geometry and Algebra II required before taking upper level math and science courses.
 Availability of High Level Courses: A policy was approved requiring most high schools to offer Advanced Placement mathematics and science courses

A new advanced placement courses was provided: AP Environmental Science

Special Education and Bilingual Students: USI teachers serve Special Education and Bilingual teachers and students with mathematics and science

Other: The Mathematics Immersion Program was implemented to bridge the achievement gap for lower performing students

Policies Impacting the Enrollment of Students in Challenging Math and Science Courses

Attendance : None
 Guidance: Supporters of Academic Rigor (SOAR) Program to promote increased enrollment in higher level
 Student Support Systems: Ramp-up 8th grade preparation for Algebra I
 Saturday academy for math/science enrichment and assistance
 Team-up math homework assistance program for middle and high schools.

Policies Relevant to Curricula

Framework: Florida Sunshine State Standards
 Curricula: Performance tasks were developed for middle school science courses
 Curricula Materials: Connected Math investigations in numbers data and space. Chemistry in the Community. Biology: a Community Content, Active Physics, are being piloted.

New Courses Added as a Result of USI:

Instructional Time: Block scheduling programs were expanded to additional secondary schools

Double blocking was used to increase middle school mathematics instruction time

Standards-based Curriculum and Instruction

Standards Adopted: National Council of Teachers of Mathematics (NCTM)

Primary Florida Sunshine State Standards

Instructional Strategies: Lecture

Projects

Hands-on

% of Students Experiencing Standards-based Mathematics Curricula: E: 100% M: 100%

% of Students Experiencing Standards-based Science Curricula: H: 100%

E: 100%

M: 100%

H: 100%

Policies Relevant to Teacher Qualifications

Certification: Requirement & Hiring Practices: Bachelors or higher degree, meet content specialization requirements, 2.5 GPA in the subject areas.

Additional college credits needed to maintain certification

Professional Advancement & Leadership Training: Administrative Training Program

Contract Requirements: No relevant policy

E: Elementary School M: Middle School H: High School

Professional Development Policies and Practices	Policies Relevant to Standards-based Assessments	USI Leadership, Governance, and Management
Time Required or Supported: Financial Resources Provided: Alignment to Student Standards: Measurement of Impact:	Extent to Which Assessments are Aligned to District Standards and Curriculums: Methods stakeholders are informed of goals, objectives and accomplishments of assessment program: Type and Amount Received by Average Math/Science Teacher: Evaluation Instruments: Professional Development Alignment to Content Standards Measures:	Superintendent: USI Office: Community Key Personnel: Teacher Leaders:
• 60 hours or more recommended	• The Stanford Achievement Test (V9) was reviewed and adopted as the norm-referenced assessment of science performance	• New Superintendent began in summer of 1998 is PI.
• Title II • USI	• The FCAT was fully aligned with the Sunshine State Standards by the Department of Education.	• Project Director reports to PI • Project Evaluator
• Inservices were aligned with Duval County expectations and Florida Sunshine State Standards	• The Terra Nova Multiple Assessment was closely aligned to test Sunshine State Standards	• Communications Specialist develops and distributes information concerning USI to others
• Not at this time	• Test results reports sent home via students	• USI Consortium formed to provide community oversight of USI activities: 40 members meet, bi-monthly
• E: 18 hours of mathematics and science content of curriculum	• School Improvement Plan objectives available in school office	• Resource teachers assist classroom teachers and provide standards-based inservice for teachers
• M, H: 150 hours content knowledge and teaching methods received by 35 teachers	• School Public Accountability Report widely available to public and publicized in media	
• District evaluation form	• Some students selected to rate their schools (G6-12)	
• Sunshine State Standards and Duval County expectations		
• Principal or designee completes classroom observation for all teachers		
• SAT-9, FCAT and Terra Nova test scores (SAT/9)		
E: Elementary School M: Middle School H: High School

Policy Changes to Support Student Success in Math and Science During USI Implementation

School Year	Policy Implemented
Before USI	<ul style="list-style-type: none"> • Before USI, 2 elementary mathematics/science resource teachers and 2 secondary resource mathematics/science teachers were supported by Eisenhower Title II funds
1998-99	• No changes reported
1999-00	• No changes reported
2000-01	<ul style="list-style-type: none"> • Saturday academies • Homework assistance program

Curriculum and Instruction Changes to Support Student Success in Math and Science During USI Implementation

School Year	Policy Implemented
Before USI	<ul style="list-style-type: none"> • The mathematics curriculum was aligned with the NCTM Standards and Florida's Sunshine State Standards. • Mathematics instruction consisted mostly of teacher lectures and students learning terms and practicing procedures • The science curriculum was aligned with the NTSE Standards and Florida's Sunshine State Standards • Science instruction consisted mostly of lectures and lab
1998-99	• Revision of mathematics curriculum for middle school, elementary school, and selected courses in high school to reflect recommendations of TIMSS report of completing fewer topics in greater depth
1999-00	• No changes reported
2000-01	<ul style="list-style-type: none"> • Math & science curriculum restructured to align with Florida Sunshine State Standards • Graduation requirements strengthened to include Biology and two Physical Science courses • Completion of Algebra I, Geometry and Algebra II are required before taking upper level math courses

Standards-based Assessment System Changes During USI Implementation

School Year	Policy Implemented
Before USI	<ul style="list-style-type: none"> • Mathematics was evaluated in 1997-98 by the Florida Comprehensive Assessment Test (FCAT), a statewide test, at grades 5, 8, and 10. Data from the 1997-98 administration of the FCAT formed the baseline for subsequent years
	<ul style="list-style-type: none"> • The High School Competency Test (HSCT) mathematics subtest was administered to all eleventh grade students in October 1997 • Mathematics and science were evaluated in 1997-98 by the TerraNova Multiple Assessment instrument (CTB/McGraw-Hill) at grades 3, 7, and 9. • The district administered the mathematics subtests of the Comprehensive Test of Basic Skills/4 (CTBS/4), a national norm-referenced test, to grades 3-9 and its science sub-test to grades 4, 6, and 8
1998-99	• The Comprehensive Test of Basic Skills/4 (CTBS/4) was dropped by the district as the norm-referenced test for mathematics and science and was replaced by the TerraNova Multiple Assessment which more closely aligns with the FCAT in design and philosophy
1999-00	• No changes reported
2000-01	• Stanford Achievement test (SAT/9) Science subtest added.

Jacksonville USI

Professional Development Policy and Program Changes to Support Teachers During USI Implementation

School Year	Policy Implemented
Before USI	<ul style="list-style-type: none"> • Title II funds provided district-wide for professional development in science and mathematics • Third, fourth, and fifth grade teachers received inservice training for three years in math and science • Secondary teachers received inservice training in math or science for three years
1998-99	<ul style="list-style-type: none"> • Required 80% of schools to have 60 hours of professional development per teacher
1999-00	<ul style="list-style-type: none"> • No changes reported
2000-01	<ul style="list-style-type: none"> • No changes reported

REPRODUCTION RELEASE

(Specific Document)

I. DOCUMENT IDENTIFICATION:

Title: Urban school Key Indicators of Science and mathematics Education: 2001

Author(s): Jason J. Kim, Linda Crasco, David Leavitt, and Ana Karantonis

Corporate Source:
Systemic Research, Inc.

Publication Date:
March 2002

II. REPRODUCTION RELEASE:

In order to disseminate as widely as possible timely and significant materials of interest to the educational community, documents announced in the monthly abstract journal of the ERIC system, *Resources in Education* (RIE), are usually made available to users in microfiche, reproduced paper copy, and electronic media, and sold through the ERIC Document Reproduction Service (EDRS). Credit is given to the source of each document, and, if reproduction release is granted, one of the following notices is affixed to the document.

If permission is granted to reproduce and disseminate the identified document, please CHECK ONE of the following three options and sign at the bottom of the page.

The sample sticker shown below will be affixed to all Level 1 documents

PERMISSION TO REPRODUCE AND DISSEMINATE THIS MATERIAL HAS BEEN GRANTED BY

Sample

TO THE EDUCATIONAL RESOURCES INFORMATION CENTER (ERIC)

Level 1

Check here for Level 1 release, permitting reproduction and dissemination in microfiche or other ERIC archival media (e.g., electronic) and paper copy.

The sample sticker shown below will be affixed to all Level 2A documents

PERMISSION TO REPRODUCE AND DISSEMINATE THIS MATERIAL IN MICROFICHE, AND IN ELECTRONIC MEDIA FOR ERIC COLLECTION SUBSCRIBERS ONLY, HAS BEEN GRANTED BY

Sample

TO THE EDUCATIONAL RESOURCES INFORMATION CENTER (ERIC)

2A

Level 2A

Check here for Level 2A release, permitting reproduction and dissemination in microfiche and in electronic media for ERIC archival collection subscribers only

The sample sticker shown below will be affixed to all Level 2B documents

PERMISSION TO REPRODUCE AND DISSEMINATE THIS MATERIAL IN MICROFICHE ONLY HAS BEEN GRANTED BY

Sample

TO THE EDUCATIONAL RESOURCES INFORMATION CENTER (ERIC)

2B

Level 2B

Check here for Level 2B release, permitting reproduction and dissemination in microfiche only

Documents will be processed as indicated provided reproduction quality permits.
If permission to reproduce is granted, but no box is checked, documents will be processed at Level 1.

I hereby grant to the Educational Resources Information Center (ERIC) nonexclusive permission to reproduce and disseminate this document as indicated above. Reproduction from the ERIC microfiche or electronic media by persons other than ERIC employees and its system contractors requires permission from the copyright holder. Exception is made for non-profit reproduction by libraries and other service agencies to satisfy information needs of educators in response to discrete inquiries.

III. DOCUMENT AVAILABILITY INFORMATION (FROM NON-ERIC SOURCE):

If permission to reproduce is not granted to ERIC, or, if you wish ERIC to cite the availability of the document from another source, please provide the following information regarding the availability of the document. (ERIC will not announce a document unless it is publicly available, and a dependable source can be specified. Contributors should also be aware that ERIC selection criteria are significantly more stringent for documents that cannot be made available through EDRS.)
